

This document was presented by  
Conny B. McCormack, Registrar-Recorder/County  
Clerk of Los Angeles County,  
on Monday July 30<sup>th</sup>, 2007 at the  
Secretary of State's, Top-to-Bottom Review  
of Voting Systems Public Hearing.

COUNTY OF LOS ANGELES  
**REGISTRAR-RECORDER/COUNTY CLERK**  
12400 IMPERIAL HWY. – P.O. BOX 1024, NORWALK, CALIFORNIA 90651-1024 (562) 462-2716

**CONNIE B. McCORMACK**  
Registrar-Recorder/County Clerk

July 19, 2007

Mr. David Jefferson  
Chair, Post-Election Audit Standards Working Group  
Center for Applied Scientific Computing  
Lawrence Livermore National Lab  
7000 East Avenue  
Livermore, CA 94550

**VIA ELECTRONIC MAIL**

Dear Mr. Jefferson:

As a follow-up to our conference call last week when you and members of the Post-Election Audit Standards Working Group requested written documentation regarding the 1% manual tally procedures and costs in Los Angeles County, our key election managers have compiled the following information:

**1% Manual Tally Reports**

**Attachment Group 1A:** Report1\_Summary.pdf, Report2\_ProceduresPrec.pdf,  
Report3\_ProceduresAV.pdf

**Attachment Group 1B:** Report4\_TallySheets.pdf, Report5\_Overview.pdf,  
Report6\_Operation.pdf

**Report 1** lists the recap summary comparison results of the ballots tallied by computer and by hand for 50 randomly selected precincts and the 38 additional precincts that were selected to cover remaining contests in the November 2006 General Election. **Reports 2 and 3** provide procedures used by tally supervisors and clerks in the 1% manual tally operation. **Report 4** provides scan samples of actual tally sheets used in the 1% manual tally operation. **Report 5** provides a general overview of the 1% Manual Tally Process. This report is available for public distribution to interested observers. **Report 6** provides staffing and workload statistics of the operation.

**Official Canvass Manuals**

**Attachment Group 2:** Roster Rec Ops Manual.pdf, Ballot Remake Ops Manual.pdf,  
Observer Guidelines.pdf

The **Roster Reconciliation Operation Manual** covers various processes of the official canvass operation including data entry, signature tabulation and provisional ballot envelope

comparison. The **Ballot Remake Operation Manual** covers duplication or enhancement procedures for absentee and precinct ballots and the various sub-categories therein (provisional, write-in, damaged and withheld ballots); and the **Canvass Observer Guidelines** cover general rules/regulations for observing canvass activities. These guidelines are made available to all visitors/observers throughout the canvass period.

**Touchscreen, Snap and Absentee Tallies**

**Attachment Group 3:** Audit1\_TSX.pdf, Audit2\_Absentee.pdf, Audit3\_Snap.pdf

These three reports detail additional voting system integrity and audit processes our staff conducted following the November 2006 General Election for electronically voted ballots, absentee ballots, and news media/voting trend comparison "snap tally" results.

**Manual Count Cost Summary – General Elections**

**Attachment Group 4:** Manual Count Costs – Nov 06.pdf

This report details the cost of the existing 1% manual count for the November 2006 General Election and the estimated costs of the manual count with the addition of absentee ballots for that same election.

As these documents reveal, conducting the required manual tally process in Los Angeles County in conjunction with the November 2006 General Election involved hand counting 25,526 ballots from 88 of Los Angeles County's 5,028 precincts. This computes to a manual tally of 1.7% of our precincts' ballots. As there were 52 contests on the ballot, the actual number of votes tallied, in order to compare and verify the vote results in each contest with the computerized count, entailed painstakingly hand-counting between 500,000 and 1,000,000 votes (depending upon how many selections each voter either voted or skipped on his/her ballot). This labor-intensive manual tally and comparison process required a staff of 50 employees working 10 hours a day, 7 days a week from November 11 through certification of the election on November 27.

To reiterate some of the key points we highlighted on the conference call, the costs – both financially and operationally – to conduct the current, legally-required process, which is specifically defined in the California Elections Code, is significant and extensive. For the November 2006 General Election in Los Angeles County the \$207,508 cost of conducting the 1% manual audit would have increased by \$73,000 if absentee ballots had been included. As you know, prior to 2007, there was no requirement to include absentee ballots in the 1% manual tally process. However, a new State law passed by the Legislature and signed by the Governor last year (AB 2769) expanded the process to include absentee ballots. Therefore, beginning this year, and for all future elections, absentee ballots will be included in the 1% manual tally process thereby creating additional expense.

It is my understanding that your Working Group is considering making a recommendation to Secretary of State Debra Bowen to expand the current manual tally process to increase the percentage of hand counted ballots and/or the number of ballots in identified contests. As a point of reference as to the significance of such a recommendation, the cost in Los Angeles County would grow to approximately \$500,000+ in each statewide election if the manual tally

percentage requirement was increased from 1% to 2% of the ballots cast. This was a subject of discussion in a recent conference call between representatives of the Los Angeles County Board of Supervisors and Secretary Bowen with regard to potential conditions the Secretary may impose on the certification of voting systems. There was clear recognition in that conference call of the significant costs and impacts of expanding the existing 1% manual tally.

As Los Angeles County represents approximately one-fourth of the State's registered voters, the statewide cost of expanding the manual tally would likely entail an additional \$1+ million per statewide election or a total of \$3+ million in conjunction with the three statewide elections in 2008 alone. In addition to such a large financial impact, the staffing logistics would require hiring, training and deploying significantly more personnel to accomplish the work within the allowable 28-day canvass period. Given physical space constraints, in Los Angeles County this would necessitate operating multiple shifts – including a night shift – of workers and supervisors to complete any expanded manual tally process within the legally-permitted timeframe prior to official certification of the results.

As was also mentioned on last week's conference call, it is vital to clarify the distinction between the separate processes of the 1% random manual tally procedure versus a candidate/voter requested recount. The legally-required 1% manual tally process occurs prior to certification of official results and involves hand counting all contests on each ballot cast in a randomly selected 1% of the voting precincts in order to verify the accuracy of the vote tally system. Conversely, a candidate/voter-initiated recount can only be requested and occur after the certification of official election results and involves only one electoral contest in which the final result shows a very small number of votes separating the winner from the loser. Candidates who request recounts following official certification are seeking to overturn the published result. This goal is quite different from the intent and purpose of the legally-mandated 1% manual tally conducted during canvass, prior to declaration of official results. Races cannot be overturned as a result of a 2%, 3%, or 4% "audit", as California law specifies that only a 100% manual recount can change the certified result of an election. A recount is initiated and paid for by the candidate or voter seeking the recount. In the rare instances in which a complete recount overturns the certified election results, the funds deposited by the candidate/voter to pay for the recount are then refunded.

The purpose of the required 1% manual tally is to verify the computerized vote count in all of the election contests on the ballot. Over the past 40 years, performing this 1% manual tally process in an open and transparent manner has drawn praise from numerous candidates and election observers who have attended and commented positively on the process. However, it has also been our experience that a losing candidate involved in an electoral contest with a razor-thin, extremely small difference between himself/herself and the declared winner invariably seeks a recount involving a request to manually tally all of the ballots cast in those precincts involved in his/her contest.

We are also concerned about representations that have been made that your Working Group "will report...suggested guidelines for reconciling manual audit and machine count results." This portion of the Working Group's mission suggests that reconciliation is a complex and uniform process that requires formal guidelines. We would suggest that "reconciliation", in this limited arena, is a basic subtraction process – the votes recorded by the machine are compared, one precinct and one contest at a time to a manual tally. Formalized "reconciliation guidelines" seem premature without first establishing and defining the need for such guidelines.

As shown above, the costs to taxpayers would be high if the current 1% manual tally process, as specified in the Elections Code, were expanded. Should the State Legislature desire to hold hearings and subsequently pass legislation signed by the Governor to alter the provisions of the Elections Code with regard to the manual vote counting provisions, our assumption is that counties would be entitled to claim reimbursement from the State for the significant additional costs.

I want to thank you and the members of the Post-Election Audit Standards Working Group, in advance, for your consideration of this information and its relevance to the recommendations and report you will be making to the Secretary of State. Should you or any members of the Working Group desire further clarification regarding the enclosed documents, please do not hesitate to call me.

Sincerely,

Conny B. McCormack  
Registrar-Recorder/County Clerk

# **OFFICIAL CANVASS BALLOT REMAKE OPERATION SECRETARY OF STATE INKAVOTE GUIDELINES**

## **15210. Torn, bent, or otherwise defective ballots shall be corrected.**

“In preparing the voted ballots for processing, any ballot that is torn, bent, or otherwise defective shall be corrected so that every vote cast by the voter shall be counted by the automatic tabulating equipment. If necessary, a true duplicate copy of the defective ballot shall be made and substituted therefore, following the intention of the voter insofar as it can be ascertained from the defective ballot. All duplicate ballots shall be clearly labeled “duplicate,” and shall bear a serial number that shall be recorded on the damaged or defective ballot.”

*(Added by Stats. 1998, c. 1073, §27.)*

Ballots will be processed by two (2) remake clerks working as a team. All remade ballots will be checked by a review team and again by the Supervisors. The Supervisor will ensure that ballots have been remade properly before they are sent to the ballot storage area.

Each team of two (2) will have the following supplies:

1. Damaged Ballot Manila Envelopes in which to place the damaged ballots.
2. Pink Duplicate ballots to be used for remaking any damaged ballots.
3. Black ink pens and black felt-tip pens/markers.
4. Blue Highlighters for enhancing ballots.

Clerk one (1) will call the number of the position to be voted/marked on the duplicate ballot card.

- a. Clerk #1 will call voting position clearly marked on the damaged ballot.
- b. Clerk #1 will call voting position to be counted based on Inka Vote Guidelines.

Clerk two (2) will mark duplicate ballot card according to instructions from Clerk #1. If voter’s intent is not clearly indicated, **DO NOT MARK THE DUPLICATE BALLOT.** See a Supervisor.

# **OFFICIAL CANVASS BALLOT REMAKE OPERATION SECRETARY OF STATE INKAVOTE GUIDELINES (Continued)**

Each original precinct ballot card must have **four hole punch marks** at the bottom of the card to indicate the three (3) digit Group Number and Party Code. Each duplicate ballot card has **four bar positions** on the bottom of the ballot. **Inform your Supervisor if you have ballot cards without these marks.** **(See figure # 3&4)**

## **Receiving AV damaged ballots in purple Absentee envelopes**

Step 1: Check the AV damaged ballot three (3) digit group number against the purple Absentee envelope group number.

Step 2: Locate the Precinct Serial number on the purple envelope. In blue pencil, write the Precinct Serial number on the back of the AV damaged ballot.

**Note:** Before remaking AV damaged ballots, each ballot must have the Precinct Serial Number written on the back in blue pencil.

## **Remaking damaged ballots**

Step 1: Count an equal number of pink duplicate ballots as there are damaged ballots to be remade for a precinct.

Step 2: Check basket for Manila Envelope to prevent from duplicating the manila envelope. If you find a manila envelope (with the same Precinct Serial Number as the ballot card)....the number of damaged cards is located on the front of the envelope and you continue with the last number on the envelope. **(Follow step # 4)**

**Note:** The number on the damaged ballot, duplicate ballot and the manila envelope all should be the same number after completing remakes.  
**(See figure # 1&2)**

Step 3: When remaking AV damaged ballots, write the four (4) digit Precinct Serial Number and the three (3) digit AV (Absentee Voter) Group number on the back of each pink duplicate ballot. **Remake one ballot at a time.**  
**(See figure # 3&4)**

# **OFFICIAL CANVASS**

## **BALLOT REMAKE OPERATION**

### **SECRETARY OF STATE**

### **INKAVOTE GUIDELINES (Continued)**

Step 4: Each original damaged ballot and duplicate ballot is sequentially numbered with a pen.

- a. Before you begin remaking damaged ballots, place damaged ballot card on top of the duplicate ballot, making sure that both ballots are lined up evenly. With a black ink pen, fill in the three (3) digit Group number in the first, second and third rows. (**See figure # 5**)
- b. The fourth row is for Party Code positions. By looking at the Party Code chart, you can determine the voter's party. (**See figure # 6**)
- c. On original damaged ballot write the number "1" on the front lower right-hand corner (**See figure # 3&4**)
- d. Write the same number on the **Remake #** line on the back of the duplicate ballot along with the **Party**. (**See figure # 3&4**)

Step 5: The voting positions that are clearly marked on the original damaged ballot should be the same voting positions clearly remade on the duplicate ballot.

Note: **If voter's intent is not clearly indicated, DO NOT MARK THE DUPLICATE BALLOT. Show your Supervisor before remaking.**

Step 6: After remaking one damaged ballot place it on top of the duplicate ballot, making sure both ballots have the same **four hole punch marks** (the three (3) digit Group Number and the Party Code.)

Step 7: When you have multiple ballots with the same Precinct Serial Number...the next damaged/duplicate ballot is numbered "2", the next "3" etc. (**Follow Steps: 2-5**).

Continue remaking ballots until all damaged ballots for that Precinct Serial Number have been remade.

# **OFFICIAL CANVASS BALLOT REMAKE OPERATION SECRETARY OF STATE INKAVOTE GUIDELINES (Continued)**

**Step 8: Complete all necessary information on the front of the Damaged Ballot Manila Envelope. (See figure # 1&2)**

**Note: Always double check the Damaged Ballot Manila Envelopes to prevent duplicating Manila envelopes.**

**Step 9: Rubberband all remade and damaged ballots together with the completed manila envelope and place in basket for supervisor to review.**

**Step 10: Repeat steps 1 through 10 with new batch of damaged precinct ballots.**

# TRACE ABSENTEE REMAKE BALLOT TO SOURCE DOCUMENT

**FIGURE #1**

**NOTE:** AV Damaged Ballot, AV Duplicate Ballot and AV Manila Envelope must have same **group** number and **remake** number to be traceable. Complete all necessary information on the front of the manila envelope. Write AV Group number on the envelope. On the back of the AV duplicate ballot, write the Precinct Serial number and the AV group number (As shown in fig. #1). Each damaged ballot and duplicate ballot is sequentially numbered with pen on the front of the damaged ballot and the back of the duplicate ballot.

# TRACE DUPLICATE BALLOT TO SOURCE DOCUMENT

## FIGURE #2

**NOTE:** Damaged Ballot, Duplicate Ballot and Manila Envelope must have same **group** number and **remake** number to be traceable. Complete all necessary information on the front of the manila envelope. Write Precinct Serial number on the envelope and on the back of the duplicate ballot. Each damaged ballot and duplicate ballot is sequentially numbered with pen on the front of the damaged ballot and the back of the duplicate ballot.

Party Code

OFFICIAL USE ONLY

GROUP NO.

509

1

## FRONT OF DAMAGED BALLOT

The Precinct Serial number is located on the back of the damaged ballot written in blue pencil.

PRECINCT SERIAL # 2645

AV GROUP # 509

REMAKE # 1 NP

## BACK OF DUPLICATE BALLOT

NOTE: Count an equal number of pink duplicate ballots as there are damaged ballots to be remade for AV Group. Write the four (4) digit Precinct Serial number and three (3) digit AV Group number on the back of each pink duplicate ballot. Complete one ballot at a time. Be sure the written number is legible. Write the number "1" on the damaged ballot in lower right hand-corner. Write the same number on the matching duplicate ballot. The next ballot is numbered "2", the next is "3" etc.

By looking at the Party Code chart, the party for the voter is NON-PARTISAN. (Refer To Figure #6)

Party Code

OFFICIAL USE ONLY

**NOTE:** Each damaged ballot and duplicate ballot is sequentially numbered with pen on the back of the duplicate ballot card and in the lower right-hand corner of the damaged ballots.

PRECINCT  
SERIAL NO.

1

### FRONT OF DAMAGED BALLOT

PRECINCT SERIAL # 1916

AV GROUP # N/A

REMAKE # 1 NP

### BACK OF DUPLICATE BALLOT

**NOTE:** Count an equal number of pink duplicate ballots as there are damaged ballots to be remade for a precinct. Write the four (4) digit precinct serial number on the back of each pink duplicate ballot. Complete one ballot at a time. Be sure the written number is legible. Write the number "1" on the damaged ballot in lower right hand-corner. Write the same number on the matching duplicate ballot. The next ballot is numbered "2", the next is "3" etc.

By looking at the Party Code chart, the party for the voter is NON-PARTISAN. (Refer To Figure #6)

# IDENTIFYING ABSENTEE GROUP NUMBERS

## FIGURE #5

**NOTE:** Before you begin remaking damaged ballots, place damaged ballot card on top of the duplicate ballot. Make sure that both ballots are lined up evenly. With a black ink pen, trace the squares of the three (3) digit Group number in the first, second and third rows before filling in the squares completely to prevent any mistakes. The position on the bottom of each damaged ballot must be marked on the duplicate ballot to show the precinct Party Code and Group number. Each precinct ballot card must have four marks at the bottom of the card to indicate the Party Code and (3) Digit Group number. Inform your Supervisor if you have cards without these marks.

# IDENTIFYING PARTY CODES

**FIGURE #6**

**NOTE:** Before you begin remaking damaged ballots, place damaged ballot card on top of the duplicate ballot. Make sure that both ballots are lined up evenly. With a black ink pen, trace the squares of the three (3) digit Group number in the first, second, third rows and the one (1) digit Party Code on the fourth row before filling in the squares completely to prevent any mistakes. The position on the bottom of each damaged ballot must be marked on the duplicate ballot to show the precinct Party Code and Group number. Each precinct ballot card must have four marks at the bottom of the card to indicate the Party Code and (3) Digit Group number. Inform your Supervisor if you have cards without these marks.

OFFICIAL USE ONLY

1

ONLY ABSENTEE BALLOTS  
HAVE A THREE (3) DIGIT  
GROUP NUMBER

**NOTE:** Three (3) digit Absentee Ballots and Four (4) digit Precinct Ballots should never be in the same Manila Envelope. Each ballot belongs to a different operation. It is important that the ballots are kept separately.

**NOTE: THE VOTER CLEARLY  
MAKES AN ERROR AT THE POLLING  
PLACE AND THE POLLING PLACE  
CLERK REPLACES THE BALLOT  
WITH ANOTHER. THE POLLING  
PLACE CLERK WRITES VOID OR  
SPOILED ON THE DAMAGED BALLOT  
CARD TO INDICATE THE VOTER  
ERROR. DO NOT REMAKE BALLOT  
CARD IMMEDIATELY RETURN TO  
YOUR SUPERVISOR.**

**BACK OF DAMAGED BALLOT**

# INDEX FOR CODING REMADE BALLOTS

REMAKE PROCEDURES HAVE CODES TO IDENTIFY THE REASON FOR THE BALLOT TO BE REMADE. ON THE BACK OF THE DUPLICATE BALLOT (IN THE RIGHT-HAND CORNER), PLACE THE CORRECT INDEX CODE TO VERIFY WHY THE BALLOT WAS REMADE.

EXAMPLE:

PRECINCT SERIAL #	<u>0554</u>
AV GROUP #	<u>N/A</u>
REMAKE #	<u>1</u> <u>NP</u>

If the ballot has smeared bubbles, (as shown on page #17) you will use code # 10 to identify the reason why the ballot is to be remade.

EXAMPLE:

PRECINCT SERIAL #	<u>0554</u>
AV GROUP #	<u>N/A</u>
REMAKE #	<u>1</u> <u>NP</u>

If the ballot is torn, (as shown on page #18) you will use code # 11 to identify why the ballot is to be remade.

VOTER BALLOT ERROR AND CORRECTIONS = ( Code # 7 )

BALLOTS WITH FOLDS AND/OR CREASES = ( Code # 8 )

DISTINCTIVE MARKS ON BALLOT = ( Code # 9 )

SMEARED BUBBLES ON BALLOT = ( Code # 10 )

TORN OR MUTILATED BALLOTS = ( Code # 11 )

# VOTER BALLOT ERROR AND CORRECTIONS

### DAMAGED BALLOT

**NOTE:** The voter clearly indicates voting error correction by using tape, strikeover, white-out or written note and marks another voting choice. Only mark the voting position. Be positively sure the voter's intent can be clearly determined.

**IMPORTANT:** Make sure you insert the remake code.

### DAMAGED BALLOT

**NOTES:** Fill in bubbles that are clearly marked by voter or where voter clearly indicates intended voting choice by completely filling inside the entire voting position in black felt-tip pen.

**IMPORTANT:** Always check to see if the ballot is voided or spoiled. If so, return to your Supervisor. Make sure you insert the remake code.

### DAMAGED BALLOT

**NOTE:** Voter indicates voting choice by using a distinctive mark. Voter consistently places distinctive marks or voting pattern. Such as (X) or (✓), encircles the voting position or punches hole inside the associated voting position. Make sure to insert the remake code.

# ~~CONFIDENTIAL CANVASS~~

## ~~CANVASS OBSERVER GUIDELINES~~

### OBSERVERS HAVE THE RIGHT TO VIEW ALL CANVASS OPERATIONS

1. All observers must report and sign in daily at the check-in desk located on the 3<sup>rd</sup> floor, Room 3001.
2. A Canvass Observer Badge will be issued and must be worn at all times. The observer's name and who they are representing (e.g., candidate, organization, campaign) will be placed on the badge.
3. When leaving for the day, please return the badge to the check-in desk.
4. No smoking, food or beverages are allowed by observers in canvass work areas. Observers are not permitted to sit in canvass work areas except when permitted by a canvass supervisor because of special circumstances.
5. Observers are prohibited from photographing or recording any process of the canvass operations. Pagers and cellular phones must be set to vibrate or off mode while observing the canvass. Telephone calls should be made outside canvass work areas. Public telephones are located on the 1<sup>st</sup>, 2<sup>nd</sup> and 4<sup>th</sup> floors.
6. The observer's function is to observe the procedures. Observers cannot assist in operations, touch or handle any ballots or other election-related material.
7. All questions concerning a procedure should be directed to the supervisor in charge and not directly to employees.
8. No more than one (1) observer per candidate, organization, campaign, etc. is allowed to observe the work of any employee. Observers should avoid physical contact with employees. The number of observers viewing any one process may be limited so as not to impede the work of any employee.
9. Observers are to hold discussions and conversations outside the designated canvass work areas.
10. Observers will be allowed into the canvass work areas only when employees are performing canvass operations. Observers must leave the work area during breaks and lunch periods.
11. Operations will continue as scheduled whether or not an observer is present.
12. **BALLOT SECURITY IS A PRIMARY CONCERN.** Failure to follow observer guidelines will be reported to Department Administration. Violation of security by an observer may cause expulsion from the building or relocation by Sheriff Deputies or Building Security.

REGISTRAR-RECORDER/COUNTY CLERK  
ELECTION PREPARATION DIVISION

## OFFICIAL CANVASS PROCEDURES

### 1% MANUAL TALLY

The 1% manual tallying of Ballot Cards is done by a (3) person board consisting of a Reader and (2) Talliers.

Working as a team of three, the Reader will sit on one side of a table; the (2) Tally Clerks, on the opposite side of the table.

#### **READER**

The Reader receives the Ballot Cards for one precinct and two Tally Sheets for the first contest to be tallied. The board will tally (1) contest on the Ballot Card at a time.

**STEP 1** Compare the (4) digit Precinct Serial Number on all of the Ballot Cards to the Precinct Serial Number on the Tally Sheets by flipping through the Ballot Cards. The numbers must agree. If they do not, INFORM A SUPERVISOR.

**NOTE:** For Primary Elections, separate the Ballot Cards by party. Count the number of Ballot Cards and record the total in the appropriate place on the Tally Sheets. Notify your Supervisor, if the hand count exceeds the computer count.

**STEP 2** The Tally Sheets indicate the Contest Name and voting position numbers of each Candidate or Measure to be counted. Be sure to note the number of marks allowed for each office. (Vote for One, Vote for Two, etc.).

**STEP 3** Identify the numbers of the voting position(s) to be tallied on the Ballot Card. Read one voting position number at a time. Wait for both talliers to respond before calling the next voting position number.

**STEP 4** Do not read marked voting position number if it is outside the range of voting position numbers identified for that contest.

#### **IMPORTANT**

##### 1. OVER VOTE

An Over Vote is a ballot condition which arises when the voter marks more candidates than the number of candidates allowed to be elected for each office. In an office to which only one candidate can be nominated or elected, a second mark creates an Over Vote condition. The result is that No vote for that office can be tallied, since the voter's intent is unknown.

In the case of Ballot Measures, a "Yes" vote and a "No" vote marked for the same measure creates the Over Vote condition.

None of the marks shall be tallied for any Candidate or Ballot Measure when an Over Vote occurs. The number of Over Votes shall be recorded for each office or ballot measure.

REGISTRAR-RECORDER/COUNTY CLERK  
ELECTION PREPARATION DIVISION

**OFFICIAL CANVASS PROCEDURES**

**1% MANUAL TALLY**

**IMPORTANT (Continued)**

**2. UNDER VOTE**

An Under Vote is a ballot condition that arises when the voter marks fewer voting position numbers than allowed for the candidates to be elected, or when the voter does not mark a voting position for or against a Ballot Measure.

Tallying the number of Under Votes for a multi-choice contest in a manual recount will add significant time to the manual recount process; therefore, **under votes should be tallied only as part of the machine tally process.**

**3. NO (BLANK) VOTES**

A blank vote, also called a No Mark, is a ballot condition that arises when the voter does not mark a voting position for any Candidate or FOR or AGAINST a ballot measure. A blank vote shall be called as a "NO Vote" on the tally sheet.

**4. NO MARK**

A "No Mark" is called for each unvoted position when the voter is allowed to vote for more than one Candidate. (i.e. Vote for Two or more)

**TALLY CLERKS**

Each Tally Clerk receives a Tally Sheet.

The (2) Tally Clerks will record simultaneously--on each Tally Sheet--the voting position called by the Reader.

The Tally Sheets of both clerks MUST agree at all times. If they do not agree, CALL A SUPERVISOR.

**STEP 1** The Tally Mark for each vote will be made in indelible pencil only in the appropriate square opposite the correctly marked position.

Tally (5) votes each square with (4) vertical lines and one diagonal line.

EXAMPLE: 

Begin with the first available square beside each candidate name or measure and continue until all votes cast for each has been tallied for that precinct.

REGISTRAR-RECORDER/COUNTY CLERK  
ELECTION PREPARATION DIVISION

**OFFICIAL CANVASS PROCEDURES**

**1% MANUAL TALLY**

**TALLY CLERKS (Continued)**

STEP 2 When all Ballot Cards have been tallied, draw a line with a red pencil from the last tally mark to the end of the line. A straight edge liner will be provided for you. Draw a line through all other unused squares for that contest or measure.

EXAMPLE:

STEP 3 Write the total number of marks tallied for each position under the preprinted machine count.

EXAMPLE: 

210
210
0

STEP 4 After the tally for a contest is completed, board members **must sign** and **date** the bottom of both Tally Sheets, as shown below:

TO BE COMPLETED BY TALLY BOARD:

WE HEREBY CERTIFY THAT THE TOTAL NUMBER OF VOTES RECEIVED BY EACH CANDIDATE FOR EACH OFFICE, (OR THE TOTAL NUMBER OF VOTES CAST FOR AND AGAINST EACH MEASURE) IS THAT SHOWN ON THE FOREGOING TALLY SHEET.

Clerk\_\_\_\_\_

Clerk\_\_\_\_\_

Clerk\_\_\_\_\_

Clerk\_\_\_\_\_

Date\_\_\_\_\_

**NOTE:** A tally sheet is considered incomplete and void unless signed by all board members.

**SUPPLIES REQUIRED:**

Red pencils  
Indelible pencils  
Liners (Rulers)  
Tally Sheets  
Adding Machine

**LOS ANGELES COUNTY  
REGISTRAR-RECORDER/COUNTY CLERK  
ELECTION PREPARATION DIVISION**

**OFFICIAL CANVASS PROCEDURES  
ABSENTEE VOTING (AV)  
1% MANUAL TALLY**

A three person board, consisting of one (1) Reader and two (2) Tally Clerks manually tally AV Ballot Cards in groups of 300.

Working as a team of three, the Reader will sit on one side of a table; while the other the (2) Tally Clerks, sit opposite of the Reader.

**READER**

The Reader receives the Ballot Cards for one precinct and two Tally Sheets for the first contest to be tallied. The board will tally (1) contest on the Ballot Card at a time.

- STEP 1** Count Ballots and separate in groups of 300.
- STEP 2** Compare the (3) digit AV Group Number on all of the Ballot Cards to the AV Group Number on the Tally Sheets by flipping through the Ballot Cards. The numbers must match. If they do not, notify your Supervisor.
- NOTE:** For Primary Elections, separate the Ballot Cards by party. Count the number of Ballot Cards and record the total in the appropriate place on the Tally Sheets. If the hand count exceeds the computer count, then notify your Supervisor.
- STEP 3** The Tally Sheets indicate the Contest Name and voting position numbers of each Candidate or Measure to be counted. Be sure to note the number of marks allowed for each office. (Vote for One, Vote for Two, etc.).
- STEP 4** Identify the numbers of the voting position(s) to be tallied on the Ballot Card. Read one voting position number at a time. Wait for both talliers to respond before calling the next voting position number.
- STEP 5** Do not read marked voting position number if it is outside the range of voting position numbers identified for that contest.

**IMPORTANT**

**1. OVERVOTE**

An Overvote is a ballot condition which arises when the voter marks more candidates than the number of candidates allowed to be elected for each office. In an office to which only one candidate can be nominated or elected, a second mark creates an Overvote condition. The result is that No vote for that office can be tallied, since the voter's intent is unknown.

In the case of Ballot Measures, a "Yes" vote and a "No" vote marked for the same measure creates the Overvote condition.

**LOS ANGELES COUNTY

1% MANUAL TALLY**

**TALLY CLERKS (Continued)**

Begin with the first available square beside each candidate name or measure and continue until all votes cast for each has been tallied for that group.

- STEP 2** When all Ballot Cards have been tallied, draw a line with a red pencil from the last tally mark to the end of the line. A straight edge liner will be provided for you. Draw a line through all other unused squares for that contest or measure.

**EXAMPLE:**

- STEP 3** Write the total number of marks tallied for each position under the preprinted machine count.

**EXAMPLE:**

119
119
0

- STEP 4** After the tally for a contest is completed, all board members must sign and date the bottom of both Tally Sheets as shown below:

- STEP 5** Once you've completed a Tally Sheet (300 Tally Marks), notify a Supervisor and a new stack of ballots and tally sheet(s) will be provided. Once you have complete all the ballots for that AV group, add all tally marks and indicate these numbers on the last tally sheet.

## **1% Manual Tally Process Overview**

Pursuant to Election Code Sections 336.5 and 15360, one percent (1%) of the voting precincts in an election is randomly selected for manually tallying of votes to verify the accuracy of the automated count. Additionally one precinct for each contest not included in the random selection is manually tallied.

### **California Elections Code**

Section 336.5 – "One percent manual tally" is the public process of manually tallying votes in 1 percent of the precincts, selected at random by the elections official, and in one precinct for each race not included in the randomly selected precincts. This procedure is conducted during the official canvass to verify the accuracy of the automated count.

Section 15360 – During the official canvass of every election in which a voting system is used, the official conducting the election shall conduct a public manual tally of the ballots tabulated by those devices cast in 1 percent of the precincts chosen at random by the elections official. If 1 percent of the precincts should be less than one whole precinct, the tally shall be conducted in one precinct chosen at random by the elections official.

In addition to the 1 percent count, the elections official shall, for each race not included in the initial group of precincts, count one additional precinct. The manual tally shall apply only to the race not previously counted. Additional precincts for the manual tally may be selected at the discretion of the elections official.

### **Procedures Used For Selecting Precincts**

Computer generated reports are used to identify precincts and contests for inclusion in the 1% random selection process. Computer listing of all the precincts within an election is produced for randomly selecting 1% manual tally precincts to verify counts tallied on computer system-readers.

### **Additional Selected Precincts**

Precincts selected for conducting the 1% manual tally are entered on a Manual Tally Control Sheet. Contests for the selected precincts are compared to a Zero Press Bulletin of Semi-Final Official Canvass Election Returns to identify contests included in the 1% random selection. Additional precincts are selected for all other races not included in the random selection. This will result in more than 1% of the precincts being manually tallied for the election.

Manual Tally Summary Sheets are produced for precincts with automated ballots cast and votes cast counts; and fields for entering the manual hand count during the tally process. Staff performs the 1 % manual tally of contests on every ballot in each precinct and records the hand count results in comparison to automated count results. Any count differences (+) or (-) are recorded on the Tally Summary Sheets. A final Recap Summary is prepared indicating totals of automated ballot count and manual tally count differences. This report is routed to Executive Office for review.

**Ballots Cast and Votes Cast (+) (-) count differences recorded on 1 % Manual Tally Recap Summary.**

**Ballots Cast Counts**

Plus (+) differences result when manual hand count for number of precinct ballots is more than automated count. This may happen if more than one ballot is processed through a system-reader at same time on Election Night or during Official Canvass semi-final tally updates.

Minus (-) differences result when manual hand count for number of precinct ballots is less than automated count. This may happen if the same ballot is processed through system-reader for a precinct more than once on Election Night or during Official Canvass semi-final tally updates or if ballot(s) were \*interfiled with another precinct.

When Ballots Cast (+) (-) differences occur normal procedures are for staff to determine whether manual or automated count is correct by recounting number of ballots and verifying to actual number of ballots processed at polling place precinct.

**Votes Cast Counts**

Plus (+) differences result when manual hand count for number of contest votes is more than automated count. This may happen if ballots with off-center or incomplete voting choice markings and other markings such as "X" or "V" are processed through system-reader on Election Night or during Official Canvass semi-final tally updates.

Minus (-) differences result when manual hand count for number of contest votes is less than automated count. This may happen if "blank" ballots or ink smeared ballots with invalid stray markings are processed through system-reader on Election Night or during Official Canvass semi-final tally updates.

When Votes Cast (+) (-) differences occur, normal procedures are for staff to determine whether manual or automated count is correct by rechecking number of votes recorded on manual tally sheets. An analysis is done of the plusses (+) and minuses (-) of selected races among the 1% precincts to determine whether a pattern of increasing or decreasing votes is indicated. If elections official has reasonable cause to believe that ballots were miscounted by computer system-reader, precinct ballots are reprocessed on another system-reader.

The (+) or (-) threshold used for reprocessing is (+) or (-) 4 votes for any contest.

**\*Note:** Official Canvass semi-final tally updates and 1 % Manual Tally activities occur simultaneously and there is sometimes an overlap between both processes requiring ballots to be interfiled and pulled from multiple locations. Absentee and Precinct ballots processed on Election Night Tally are maintained in separate ballot security cabinets from ballots processed in subsequent semi-final tally updates during Official Canvass.

REGISTRAR-RECORDER/COUNTY CLERK  
ELECTION PREPARATION DIVISION

ELECTION COORDINATION SECTION

**OVERVIEW OF THE  
ROSTER RECONCILIATION OPERATIONS**

The following Official Canvass Procedures are used for performing Roster Reconciliation Operations during Canvass.

1. On Wednesday the day after the Election the Rosters and Pink Provisional Lists are delivered by the Service Center Operation to the MTS Room. The Roster of Voters and Provisional Lists are rubber banded together by Serial Number and kept as one during Canvass. These are often referred to as "Books" throughout these Official Canvass Procedures.
2. Election Coordination Section (ECS) Staff starts pre-sorting the Books for processing by the Data Input Operation staff.
3. As the ECS staff is sorting the Books, the Roster Reconciliation Data Input staff starts entering the Official Ballot Statement information into the Roster Reconciliation System. Books that are stamped **SNAG and/or BLANK** are processed as **First and Second Priority**. Books with an Operator's **CSV #** stamp are processed continuously in between working the priority **SNAG and/or BLANK** Books.
4. Books are then sent to the Roster of Voters Operation for the Signature Count and Adding Machine Taping Process.
5. Books are forwarded to the Issue and Re-file Operation where the Books are filed in Serial Number order of no more than stacks of 20.
6. The Books are returned to the Issue and Re-File Operation throughout Canvass. Where they are filed back into Serial Number order. Books will be pulled and filed as needed during the Official Canvass Process.
7. During the Official Canvass Process, Data Input, Polls & Officers, Service Center Operation and Absent Voting Sections will send the following items to be processed during Canvass:
  - **Emergency Absentee Ballot Envelopes** will be checked against the Books to ensure a voter only voted once.
  - **Voter with Disability Cards** are checked against the Books to ensure that VWD is counted as a signature.
  - **Provisional Ballot Envelopes** are sorted by **count and no count**. Envelopes are opened for ballots to be counted and envelopes are maintained in Serial Number order. No count Provisional Envelopes are only maintained in Serial Number order. After the completion of the official Canvass, Election Preparation Division notifies the Voter Records Division that the Provisional Envelopes are available for them to update the modules, if necessary.
8. After the Official Canvass Process has been completed, the Books are maintained in Serial Number order until Election Preparation Division notifies the Voter Records Division that they are ready for scanning.

and  
Pink Provisional Lists

REGISTRAR-RECORDER/COUNTY CLERK  
ELECTION PREPARATION DIVISION

ELECTION COORDINATION SECTION

**OFFICIAL CANVASS PROCEDURES  
PRIORITIZING ROSTERS AND PINK PROVISIONAL LIST**

The day after the Election, the Rosters and Pink Provisional Lists are delivered by the Service Center Operation Section to the MTS Room. The Roster of Voters and Provisional Lists are rubber banded together by Serial Number and kept as one during Canvass. These are often referred to as "Books" throughout these Official Canvass Procedures.

Election Coordination Staff (ECS) starts pre-sorting and organizing the Books for processing by the Roster Reconciliation Data Input Operators by:

1. Checking to ensure both Books belong to the same Precinct.
2. If the Ballot Statements are still attached to the Books the statements must be detached and separated.
  - a. White copy is stapled inside the front cover of the Book.
  - b. Yellow copy is sent to Election Planning Section.
3. The Books are then prioritized and sorted for processing into groups as follows:
  - a. Snag Books
  - b. Blank Books
  - c. Rosters Only
  - d. Pink Supplemental Lists Only
  - e. Complete set; Roster and Pink Supplemental List (same Serial Number)

The Data Input Operators have the following Stamps for processing the Books.

1. **CSV # Stamp** - each Operator is assigned a number, and will stamp the Books they process to acknowledge that information has been added to the Roster Reconciliation System.
2. **SNAG Stamp** - used to **SNAG** a Book when the Official Ballot Statement is not completely filled in by the pollworkers and/or if the number on the computer screen indicates a **difference** of more than 50 according to the Roster Reconciliation System. The Operator will stamp the Book with the **SNAG** Stamp, placing it next to the Official Ballot Statement on cover of Book.
3. **BLANK Stamp** - used to indicate a Book with a **BLANK** Official Ballot Statement. However, if only line one is completed, these Books are still considered **BLANK**.

The ECS staff continues to sort the Books. Once all of the Ballot Statement information is entered into the Roster Reconciliation System, Books are sent to Roster Issue and Re-File Operation to be sorted and filed into numeric order, keeping them in stacks of no more than 20. They will then work the Books verifying signature counts.

If the Roster is missing, the Pink Supplemental List is set aside in numeric order until the matching Roster is located. Once both Books are together they will be forwarded to the Roster Reconciliation Data Input Operators.

If the Pink Supplemental List is missing, the Rosters continue to be processed and will later be matched up with the Pink Supplemental List.

**PROCEDURE**

**Roster Reconciliation System**

REGISTRAR-RECORDER/COUNTY CLERK  
ELECTION PREPARATION DIVISION

ELECTION COORDINATION SECTION

OFFICIAL CANVASS PROCEDURES  
ROSTERS RECONCILIATION SYSTEM

Rosters and Provisional Ballot Input Data Operation is held inside the MTS Room where Data Input Operators will update the Official Ballot Statement information to the Roster Reconciliation System for comparison of signatures to number of ballots cast, as follows:

**BLANK ROSTERS** – Official Ballot Statement is usually completely blank. Data Input Operators will enter the number of ballots ordered displayed on computer screen in Line 1 Total Ballots Received; enter Y to indicate Blank Roster and stamp **BLANK** on the Roster Books. Books will be forwarded to Processing Roster of Voters Operation for signature counting, Procedure 4.

The screenshot shows the GSE software interface. On the left is the 'Official Ballot Statement' document, which is mostly blank except for the header 'COUNTY OF LOS ANGELES STATE OF CALIFORNIA' and the title 'ROSTER OF VOTERS BLANK'. On the right is the 'Election Preparation Information' window, showing various election-related data. A large red circle highlights the 'Total Ballots Received' field in the software, which displays the value '1700'. Another red circle highlights the 'Roster Sign Checked' checkbox in the bottom right corner of the software window.

**SNAG ROSTERS** – Official Ballot Statement has 50 or more signatures missing or information is incorrect. Data Input Operators will stamp **SNAG** on the Roster Books. Books will be forwarded to Processing Roster of Voters Operation for signature counting, Procedure 4.

The screenshot shows the GSE software interface. On the left is the 'Official Ballot Statement' document, which includes a table of voter counts and a note about missing signatures. On the right is the 'Election Preparation Information' window. A large red circle highlights the 'Total Ballots Received' field in the software, which displays the value '1700'. Another red circle highlights the 'Roster Sign Checked' checkbox in the bottom right corner of the software window. A large white circle with the number '141' is overlaid on the bottom left of the software window.

## ROSTER RECONCILIATION OPERATION (continued)

**REGULAR UPDATES** – Data Input Operator updates information from Official Ballot Statement for reconciling Roster/Provisional signatures to number of ballots cast for each precinct.

**OPTION A – Add Ballot Statement Information:** Official Ballot Statement information is added to Roster Reconciliation System for the first time so that the computer screen will contain the data. Data Input Operators will stamp **CVS #** on the Roster Books to indicate information has been added to the System.

## **PROCESSING ROSTER OF VOTERS (continued)**

3. Enter Signature Count for each page in space provided in the lower right hand corner of the Roster page. In some instances the count will already be entered by the Precinct Officer. Using a blue pencil place a check mark, if the count is correct. If your count is different, cross out number and enter your count, using the blue pencil.

4. Count initials VWD as a Signature. These initials are used to identify Voters With Disabilities.

## PROCESSING ROSTER OF VOTERS (continued)

### 5. Count Signatures on the Blue Supplemental Roster Pages

VOTER STATUS

## **ADDING MACHINE TAPING PROCESS (continued)**

3. You will add Roster of Voters (white pages) and the Supplemental Roster (blue pages) found taped inside the back cover of the Roster of Voters.
  4. Starting with pages in the Roster add up Signature Counts found in the **lower right side of each page** with a calculator.

5. To verify your total Signature Count, you will run a calculator tape **TWICE**, first time from “beginning to end” and second time from “end to beginning.”

Beginning to End	End to Beginning	
0 - C	C.G.	0 -
1 -	11-7-06	15 -
2 -	SERIAL NO.	14 -
3 -	0020	13 -
4 -		12 -
5 -		11 -
6 -		10 -
7 -		9 -
8 -		8 -
9 -		7 -
10 -		6 -
11 -		5 -
12 -		4 -
13 -		3 -
14 -		2 -
15 -		1 -
160 - 42		+ 170 - 42

- Both totals should be the SAME if not repeat the process. When totals match; initial, date and add Serial Number on top left corner of tape and staple to inside back cover of Roster of Voters.

## ADDING MACHINE \TAPING PROCESS (continued)

- Check the front cover of Roster (Official Ballot Statement) and if Line 9 is same as total on calculator tape, place a blue check mark next to the number.

Line 9 →

- Once you have completed working the Roster, place it **face down**, so the Canvass Runner will know to return the Books to the Roster Issue and File Operation.
- If Line 9 is different from tape, cross out total on Line 9 and change number to your calculator tape total, using blue pencil.

Line 9 →

- Place these Books in a separate stack **face down** indicating to the Canvass Runner you are finished with these Books and they can be returned to the Data Input Operation in the MTS Room for updating.

**PROCEDURE**

**Emergency Absentee Ballot Envelopes**

**REGISTRAR-RECORDER/COUNTY CLERK  
ELECTION PREPARATION DIVISION**

**ELECTION COORDINATION SECTION**

**OFFICIAL CANVASS PROCEDURES  
EMERGENCY ABSENTEE BALLOT ENVELOPES PROCESS**

1. Receive Emergency Absentee Voter (EAV) Envelopes from the Data Entry Section. Envelopes will have a print out of Dims-NeT Screen paper clipped to the front of the EAV Envelope. Remove the paper clip, tap the Emergency AV Envelope to ensure ballot is at the bottom of the envelope, then staple Dims-NeT print out to the back of Emergency AV Envelope.

Screenshot of the Election Day Information screen. It shows voter details: Name: MARIA LOPEZ, Address: 411 PINE ST, City: LOS ANGELES CA 90011, Date of Birth: 05/03/1952, Sex: Female, and Signature: [Signature]. Below this is the Absent Voter Ballot Info section, which includes fields for Name, Address, Category, Source, and Status. At the bottom, there are buttons for 'Print', 'Email', and 'Cancel'.

Screenshot of the 'YOU MAY RETURN YOUR VOTED BALLOT' screen. It contains instructions: 'BY MAIL - BEFORE ELECTION DAY (Postmarks are not acceptable)', 'BY PERSONAL DELIVERY - BEFORE ELECTION DAY', and 'BY PERSONAL DELIVERY - ON ELECTION DAY'. There is a checkbox for 'MADE A CHANGE TO YOUR BALLOT AND YOU WANT A NEW ONE?'. Below this is a 'Print Return Address and City Where Registered' section with a 'Print' button. At the bottom right, there is a printed address: A113-B09 0305747, Bldg. 1000, Rm. 101, E. 113 000102A 1 REGULAR, 12499 INFERNO AVY NORWALK, CA 90650.

2. The Serial Number is located on the Dims-NeT print out. Add Serial Number to the upper right hand corner of the EAV Envelope. If Serial Number is less than four digits add leading zero.
3. Sort Emergency AV Envelopes into Serial Number order and send to the Issue and File Operation.
4. The Issue and File Clerks will pull Books and place Emergency Absentee Ballot Envelopes with matching Serial Numbers inside the front cover of the Roster Books for posting.
5. A Canvass Runner will deliver the Books to the Roster of Voters Operation Clerk to check Roster of Voters Section Pages and Blue Supplemental Pages to verify if a Signature has been written in after the voter's residence address on the pages. (The blue pages are taped to the back cover of the Rosters.)

Screenshot of the 'OFFICIAL BALLOT STATEMENT' page of the Roster of Voters book. It includes a 'ROSTER OF VOTERS' title, a circular logo, and instructions: 'Call 1-800-315-2666 (Press Option 7) if you have not received the BLUE and LAVENDER lists in the mail by the Monday prior to the election'. It also provides 'Telephone Numbers for Election Problems Located Inside the Front Cover' and 'After completing all entries for closing polls, place the Roster in a Green Stripe Envelope'.

Screenshot of the 'SUPPLEMENTAL ROSTER PAGE' of the Roster of Voters book. It shows a grid of names and addresses for voters, with columns for 'NAME', 'ADDRESS', 'PHONE NUMBER', and 'MAILING ADDRESS'. The page is labeled 'SUPPLEMENTAL ROSTER PAGE (A-1)'.

## **EMERGENCY ABSENTEE BALLOT ENVELOPES PROCESS (Continued)**

6. If the preprinted name **is** found in the Roster, place an "EAV" (Emergency Absentee Voter) after the voter's printed name. /

7. When Signature is **not** found in the Roster of Voters or Blue Supplemental Roster Pages write "DNSR" (Did Not Sign Roster) in lower right corner of Emergency Absentee Ballot Envelope and initial.

9. If name **is** found in Roster, and instead of a Signature you have any of the following text, T/S, AVTS, TSAV, OR VTS (Voted Touchscreen), write "T/S" in lower right corner of Emergency Absentee Ballot Envelope and initial.

10. Be sure to initial each Emergency Absentee Ballot Envelope in the lower right corner and place in basket on your table.
  11. When voters name is **not** found in Roster of Voters or Blue Supplemental Roster Pages, return envelope to Supervisor.

## **EMERGENCY ABSENTEE BALLOT ENVELOPES PROCESS (Continued)**

12. Canvass Supervisors will pick up the EAV Envelopes from baskets and take to the Canvass Clerks to sort the envelopes by "DNSR", "T/S" or "SR" they are then returned to the Document and Receipt and Absentee Voting Section.
13. A report is sent to Canvass Coordinator, reporting amount of "EAV" Envelopes processed.

### **Memorandum**

3. The Provisional Ballot Envelopes arrive in trays from Data Entry Section sorted into groups of  Count or  No Count.

A Supervisor will quickly fan through a stack of Provisional Ballot Envelopes to ensure that each envelope has the same check mark indicating  Count or  No Count. When the Supervisor finds an envelope with the opposite check mark such as:

A Stack of  Count and a  No Count is found it will be pulled.

If the Supervisor finds an Envelope that is  BLANK with no check mark indicating  Count or  No Count they are also pulled.

The pulled Provisional Ballot Envelopes will be returned to Data Entry Section for clarification.

## PROVISIONAL BALLOT ENVELOPES PROCESS (continued)

6. Verify that a check mark is placed in appropriate box on Provisional Ballot Envelope for the Ballot Card to be counted ( Count). If Envelope is not checked count, return to supervisor.

7. If both Provisional Envelope and Ballot card Serial Numbers match, **separate Ballot Card from Provisional Ballot Envelope**. If Write-In Stub is still attached to Ballot Card and it is Blank detach Ballot Card.
8. You will have four stacks; **(A) Official Ballot Cards, (B) Provisional Ballot Envelopes, (C) Pink Secrecy Sleeves, (D) Blank Write-in Ballot Stubs.**

## PROVISIONAL BALLOT ENVELOPES OPERATION (continued)

9. Considered Snags: **Do Not Separate** the Ballot Card from Provisional Ballot Envelope if you find the following **Snag Situations**. Place Ballot Card back in Envelope and return Envelope to Supervisor if:

a) Serial Number is different, write **W/S** (wrong Serial Number) on Envelope.

b) Envelope has an Absentee Voter Ballot Card (three digits), write **AV Ballot** on Envelope.

c) Two Ballots Cards in same Envelope; write **Two Ballots** on Envelope.

d) There is no Ballot Card write **No Ballot** on Envelope.

e) If Write-In Ballot Stub has a Write-In Candidate's Name or anything written on the Write-In Ballot Stub, write **Write-In** on Envelope.

f) Demonstration/Emergency Ballot Cards are Yellow. If Envelope has a Yellow Ballot Card write **Demonstration/Emergency Ballot** on Envelope.

g) Ballot Card in Envelope is Void, Spoiled or Surrendered. Write **Ballot Void**, **Ballot Spoiled** or **Ballot Surrendered** on Envelope.

h) Envelope has Correspondence only and No Ballot Card. Write **No Ballot** on Envelope and write the Precinct Number on Correspondence, give Correspondence to your Supervisor.

i) Ballot Card does not have Serial Number. Write **No Serial Number** on Envelope.

j) Envelope has an Audio Ballot.

10. Initial Provisional Ballot Envelope in the upper left corner under **Clerk 1**.

### FILING “COMPLETED” PROVISIONAL BALLOT ENVELOPES

- After Ballot Card has been pulled from opened Provisional Ballot Envelopes, send empty Provisional Ballot Envelope to pre-sort area.

## **PROVISIONAL BALLOT ENVELOPES OPERATION (continued)**

2. Canvass Staff will sort Provisional Ballot Envelopes and sort into "numerical order" by the four digit Serial Number.
3. The Envelopes are delivered to Data Input Operator to update the Roster Reconciliation System.
4. The Provisional Ballot Envelopes are then sent back to Issue and File Operation to be matched with Books and then forwarded to Roster of Voters Operation.

### **SUPERVISOR'S NOTES**

1. After opening a Snagged Provisional Ballot Envelope, use the following procedures to process them:
  - a) Two Ballots Cards are in Envelope, one is an Absent Voter Ballot Card and one is a Precinct Ballot Card;  
You write Surrendered and Precinct Serial Number on the Absentee Ballot Card and process Precinct Ballot Card.
  - b) Both are Precinct Ballots Cards and one is Void and the other is a good Ballot Card;  
You will process the good Ballot Card.
  - c) If the Ballot Card is a Yellow Demonstration/Emergency Ballot Card;  
You will give Ballot Card and Envelope to Canvass Coordinator for verification
  - d) If a Write-in Ballot Stub is attached to Ballot Card and has a Write-In;  
Forward Envelope with Ballot Card to the Write-in Operation.
  - e) Provisional Ballot Envelope may have Correspondence and should be forwarded to the respective Sections, such as, Affidavit Registration Cards, corrections to the Voter File, notes for Polls Section, etc.;  
Place the Precinct Number on the Correspondence and then forward to the appropriate Section.
  - f) If both Ballot Cards are Precinct Ballots Cards and both were marked identically;  
You void one and process the other. Give voided Ballot to Canvass Assistant Coordinator. If both Ballots Cards are not marked the same, void both and retain Precinct Ballot Envelope labeled Void/Spoiled or Surrendered place Ballot Cards back in Envelope and give to Canvass Assistant Coordinator.
  - g) If Ballot Card is Void/Spoiled or Surrendered;  
Remove Ballot Card and process the Envelope as usual. You will **NOT** minus signature if the voter signed the Roster.
  - h) If there is No Ballot Card;  
You will process the Envelope as usual. You will **NOT** minus the signature if the voter signed the Roster.
  - i) If there is an Audio Ballot;  
Forward Envelope with ballot to the Remake Operation.

NOTES: Any Provisional Envelope that is marked Count by the Data Entry Section and is found to be a No Count by the Canvass Staff the Provisional Envelope must be sent back to the Data Entry Section to update the Provisional Voter Module to reflect the No Count.

Empty Provisional Ballot Envelopes will be sorted into Serial Number order. Then forward these Envelopes to the Data Input Operation for posting in Roster Reconciliation System. Envelopes will be forwarded back to Roster Reconciliation Area and/or Issue and File Operation to be matched with Rosters.

## PROVISIONAL BALLOT ENVELOPES OPERATION (continued)

### SIGNATURE VERIFICATION OPERATION

1. Receive Roster Book with Provisional Envelopes. Check that both items have same Serial Number. If items do not match return items to your Supervisor.
2. Check Roster to see if a signature is placed after the voter's name on Roster of Voters. Also check Blue Supplemental Roster Pages for signatures.
3. If name is preprinted only (i.e. JOHN DOE) and there is NO signature on Roster, add a "P" after the voters printed name (see Line 3).
4. **Do not subtract** signature from page count.

<p><b>ROSTER OF VOTERS</b></p>	<p><b>SUPPLEMENTAL ROSTER PAGE (A - K)</b></p>
--------------------------------	--

5. If signature (*John Doe*) is in Roster, line out signature and place a "P" after the voter's printed name (see Line 13).
6. If signature count changes **subtract** signature from page count.

## PROVISIONAL BALLOT ENVELOPES OPERATION (continued)

7. If page count is changed, adjust figures on Adding Machine Tape and Official Ballot Statement. Return Books to Data Entry Operation for correction. If no changes are made return the Books to Issue and File Operation.

3. The Provisional Ballot Envelopes arrive in trays from Data Entry Section sorted into groups of  Count or  No Count.

A Supervisor will quickly fan through a stack of Provisional Ballot Envelopes to ensure that each envelope has the same check mark indicating  Count or  No Count. When the Supervisor finds an envelope with the opposite check mark such as:

A Stack of  No Count and a  Count is found it will be pulled.

If the Supervisor finds an Envelope that is  BLANK with no check mark indicating  Count or  No Count they are also pulled.

The pulled Provisional Ballot Envelopes will be returned to Data Entry Section for clarification.

**Voters with Disability Cards**

## **OFFICIAL CANVASS PROCEDURES PROCESSING VOTERS WITH DISABILITY CARDS**

1. Receive **Voter with Disability Cards** (VWD) from Polls and Officers Section.
  2. The VWD Cards will be sent to the Data Input Operation to add Serial Numbers. If Data Input Operation is unable to add Serial Numbers to the VWD Cards, check for Serial Numbers using the CIC Serial Number List. The Serial Numbers should be written on the upper right hand corner of the **Voter with Disability Cards**.

3. Sort Voter with Disability Cards by Serial Numbers and send Cards to Roster Issue & File Operation.
  4. The Roster Issue & File clerks will pull the Books and place the VWD Cards inside the front cover of the Roster.

## **PROCESSING VOTERS WITH DISABILITY CARDS (continued)**

5. Once you receive the Books with VWD Cards, check to make sure both items have the same Serial Number, if not, return Roster and Cards to your Supervisor.

6. Check Roster of Voters Section Pages of the Book, including Blue Supplemental Pages. (The blue pages are taped to the inside back Cover of the Roster.)
  7. If letters VWD initials appear on voters signature line and signature count in Roster page is correct, staple Card to Roster page and send Roster Book for re-file.
  8. Check to see if the letters VWD appear on voters signature line. Verify whether they were included in the Signature Page Count. If the letters VWD **do not appear**, write the letters VWD on the signature line for that voter.
  9. Add these initials as a signature to the Signature Page Count. Staple VWD Card to that specific page in the Roster.
  10. Adjust figures on adding machine tape by adding +1 VWD.

10. Adjust figures on adding machine tape by adding +1 VWD.

**CONNY B. McCORMACK**  
Registrar-Recorder/County Clerk

December 4, 2006

TO: Each Supervisor  
FROM: Conny B. McCormack, Registrar-Recorder/County Clerk

**NOVEMBER 2006 ELECTION REPORT: MANUAL TO MACHINE COUNT COMPARISON OF RANDOMLY SELECTED 5% ELECTRONIC TOUCHSCREEN VOTING UNITS**

At the Board meeting on October 24, 2006, upon motion by Supervisor Zev Yaroslavsky, your Board instructed the Registrar-Recorder/County Clerk (RR/CC) to:

1. Conduct an audit of votes cast on no fewer than 5% of the Direct Recording Electronic (DRE or "Touchscreen") devices used for early voting in the November 7, 2006 Gubernatorial General Election (November 2006 General) that includes comparing the votes recorded on the Voter-Verifiable Paper Audit Trail (VVPAT) with the votes recorded on DRE memory card vote tally system count for a random selection of contests; and
2. Report back to the Board with the findings of the manual count by December 5, 2006, the statutory deadline for the official election certification.

**Introduction**

The California Elections Code requires each local election official to conduct a manual count of all contests on ballots cast in a randomly selected 1% of the election day voting precincts in order to verify the accuracy of the machine count. This manual tally occurs during the 28-day vote canvassing period prior to official certification of election results and augments extensive pre-election testing activities to demonstrate the integrity of the vote tabulation system.

In addition to the manual count audit required by the State Elections Code as described above, and in the interest of enhancing public confidence in the County's multiple voting systems, your Board requested two additional manual to machine count audits in conjunction with the November 2006 Election. Additionally, the Registrar-Recorder/County Clerk (RR/CC) decided to conduct a third supplemental manual audit of a sampling of absentee by mail ballots. A chart of all four audits is found at Attachment 1 following the appendices.

This report addresses the manual to machine count comparison of a randomly selected 5% of the DRE or Touchscreen voting units deployed in conjunction with Early Voting during the November 2006 General Election. A separate report will be issued tomorrow to address the other Board-requested report with regard to "snap tally" precincts in conjunction with the November 2006 Election. A report of findings of the RR/CC's audit of absentee by mail ballots will be issued later this week.

## **Background**

Los Angeles County has been using Diebold DRE devices for Touchscreen Early Voting (TEV) in conjunction with all major elections since November 2000 without experiencing technical or security problems with the preparation, deployment and use of these devices to accurately tally votes cast. The TEV period typically begins the 2<sup>nd</sup> Wednesday before Election Day, and concludes ten (10) days later on the Friday before Election Day (the exception is RR/CC Norwalk headquarters where Touchscreen voting begins two weeks earlier and continues through Election Day to correspond with the entire period of availability of absentee voting).

Depending on anticipated voter turnout, the RR/CC establishes between 15 and 20 TEV sites throughout the County. Historically, approximately 1% to 2% of the County's voters avail themselves of the convenience of voting on DRE devices at their choice of location during the TEV period. For the November 2006 election, 24,686 or 1.2% of the 2,033,199 voters countywide cast their ballots using the DRE equipment.

Following the November 2004 Presidential Election, discussions about the accuracy and reliability of electronic voting equipment began to accelerate around the country. In response, State law was passed in 2005 requiring all electronic touchscreen voting equipment in California to be equipped with a voter-verifiable paper audit trail (VVPAT) beginning with elections in 2006.

Continual public concerns culminated in your Board's October 24, 2006 motion instructing the RR/CC to conduct a manual count using the VVPAT paper rolls and report back on a comparison of manual to machine counts on a randomly selected 5% of the 150 Diebold AccuVote-TSX with VVPAT devices used for TEV during the November 2006 General Election.

Fortunately, the RR/CC had some previous experience in this regard, having conducted a more limited post-election audit of votes cast on one (1) randomly selected Diebold TSX unit with VVPAT following the June 6, 2006 Gubernatorial Primary Election. Experience gained from that citizen-observed audit of one TEV unit formed the basis for the development of the necessary procedures for comparing the votes cast and recorded on the more expanded 5% audit of TSX memory cards with the VVPAT, including a methodology for resolving any differences between totals due to VVPAT printer problems. Following public notification, the 5% audit was performed on November 13<sup>th</sup> and 14<sup>th</sup>, 2006 in the presence of a number of citizen observers. Supervisor Yaroslavsky joined the observation process for several hours on November 13<sup>th</sup>.

## **The 5% TSX Random Audit Process**

For the November 2006 General Election, 150 AccuVote-TSX devices with VVPAT were deployed to 17 locations, including 22 devices at RR/CC headquarters in Norwalk and 8 devices in each of the 16 remote sites. The devices in all 16 remote sites were available for voting between October 25<sup>th</sup> until November 3<sup>rd</sup>. The devices in Norwalk were available from October 11<sup>th</sup> through Election Day, November 7<sup>th</sup>.

Given the total of 150 DRE devices used during the November 2006 General Election, the 5% target equated to auditing eight (8) devices. These 8 devices were selected randomly by citizen observers from folded slips of paper in a transparent container at RR/CC Norwalk headquarters on the morning of November 13<sup>th</sup>. Each slip contained the TEV Site Name and the DRE Machine Number for that site. The list of all TEV sites and machine numbers is provided in Appendix B of this document.

The parameters of the audit entailed selecting four (4) contests listed on the ballot, in recognition of the time and costs required to carry out the manual audit while simultaneously

demonstrating the accuracy of the DRE devices. Two (2) contests were selected for audit on the first 4 of the 8 devices randomly selected. The other 2 contests were selected for audit on the remaining 4 devices. The selection of these 4 contests was partly deliberate and partly random. The RR/CC deliberately included the races for Governor and Secretary of State, as those contests garnered significant public interest.

The remaining 2 contests were selected randomly by drawing two (2) slips from a transparent container of folded paper slips representing all countywide contests and propositions, excluding judicial contests. Selecting countywide contests guaranteed that the contest would appear on every ballot regardless of the voter's residence. Judicial contests were excluded due to historically high under-voting (no selection made) in such contests. The 2 contests that were randomly selected by the citizen observers present were the contest for U.S. Senate and statewide ballot measure Proposition 86.

The complete description of the procedures used for the 5% random audit are found at Appendix A.

The results of the machine and contest selection and pairing are presented in the table below:

TEV Site	Machine No.	Contests Examined
AC Bilbrew	3	▪ Governor ▪ U.S. Senate
Calabasas	2	
Carson	4	
Pasadena	1	
AC Bilbrew	7	▪ Secretary of State ▪ Proposition 86
East L.A. Library	1	
Lakewood	6	
Pasadena	7	

Once the devices and the contests were selected, citizen observers accompanied RR/CC staff to the 3<sup>rd</sup> Floor MTS Room where the memory cards and VVPAT security canisters are securely stored. The memory cards and canisters used in each selected machine were retrieved from locked storage cabinets containing numbered and logged seals. The memory cards and canisters were then taken to the 7<sup>th</sup> Floor Conference Room, where two (2) AccuVote-TSX units were used to print election summary reports from each of the 8 units' memory cards. The selected contests for each machine were isolated and then cut out from each of the election summary reports and attached to separate manual tally sheets used for the manual count comparison. Several observers attended the manual to machine count comparison throughout the entire day on November 13<sup>th</sup>.

The manual count comparison involved reading each ballot printed on the VVPAT paper roll(s) from each selected machine, identifying the desired contest on the ballot and then tallying which candidate or yes/no (for ballot proposition) position received the vote. Once all the ballots on all the randomly selected VVPAT paper rolls were reviewed, the manual tally scores were totaled and compared to the totals from the election summary tapes. Slight variances between the manual tallies and the election summary tapes occurred due to one of two causes:

1. The VVPAT paper roll had a printer problem that caused one or more ballots on the roll to be illegible and therefore uncountable; or

2. Staff made an error in the manual tally, either by scoring the vote for the wrong candidate, inadvertently reading votes from a provisional or rejected ballot, losing track of ballots read, or some other human error.

Five (5) of the 8 selected devices showed exactly matching tallies between the manual tally and the election summary tape on the first manual tally from the VVPAT paper rolls. Two (2) of the 8 selected devices, i.e. those containing the largest number of votes, required several manual tally attempts prior to arriving at matching totals. This corresponds with past experience in manual tallies of all types of ballots (punch card and optical scan), i.e. a correlation between larger ballot counts which yields higher rates of human error in reading and manually tallying votes.

One machine had a VVPAT paper roll with two (2) partially illegible ballots and one (1) completely illegible ballot due to paper jams in the VVPAT. However, by printing out all of the ballot images from this machine and comparing those to the ballots on the VVPAT paper roll, it was possible to deduce which ballot images belonged to the illegible ballots and to arrive at an exact match tally for that machine.

The audit demonstrated that printer jams can and do occur which can cause all or part of a printed ballot to be illegible on the VVPAT paper roll. It also demonstrated that by using a printout of ballots cast generated from the TSX database it is possible to accurately deduce which ballots were undecipherable on the VVPAT paper roll due to a printer jam.

The table on the following page summarizes the data and findings of the manual count comparison for each of the 8 selected devices:

### Results of the Manual Count Comparison

TEV Site	Machine No.	VVPAT Rolls	Ballots Cast	First Tally Matched	Cause of Discrepancy	Resolution
AC Bilbrew	3	1	19	Yes		
Calabasas	2	2	44	Yes		
Carson	4	1	139	Yes		
Pasadena	1	2	29	Yes		
AC Bilbrew	7	1	20	Yes		
East L.A. Library	1	1	26	No	Printer Jam /Illegible Ballots	Obtained Ballot Images For Illegible Ballots
Lakewood	6	2	181	No	Human Error	Matched After Multiple Manual Tally Attempts
Pasadena	7	3	285	No	Human Error	Matched After Multiple Manual Tally Attempts

Data on the number of votes cast for each candidate in the selected contests by machine is detailed in Appendix C of this document.

### Conclusion

The manual count audit of the 8 randomly selected TSX devices used in the November 2006 General Election confirmed the accuracy of the computerized vote totals compiled by the Diebold's AccuVote-TSX machines in use in Los Angeles County. However, given the susceptibility of all printer technologies to occasional paper jams, the audit raised serious concerns about the wisdom of the designation of the VVPAT as the *official* record of votes cast (which is now State law in the event of a recount of a closely contested race). Relying on the VVPAT for official tallies during recounts poses the considerable risk of resulting in the unintended consequence of disenfranchising some voters whose VVPAT jammed especially when those voters' ballots can clearly be confirmed by accessing the electronic images. Additionally, the experience with this audit confirms the experience of many election administrators that, as the volume of ballots increases, manual counting of votes by humans becomes increasingly less reliable due to the tendency for human error in performing simple, repetitive tasks on a large scale.

## **Appendix A**

### ***Procedures for 5% Random Audit of AccuVote TSX Devices Used in the November 7, 2006 Gubernatorial General Election***

**November 13, 2006**

1. Welcome and Introduction
2. Brief description of the random audit process.
  - a. Observers will randomly select eight TSX devices by drawing paper slips from a group of slips representing devices used in Touchscreen Early Voting for the general election. Eight devices represent over 5% of devices deployed for the election.
  - b. Audited contests will include the contests for Governor and Secretary of State, as well as two other countywide contests randomly selected by drawing paper slips prepared for all other non-judicial countywide contests.
  - c. Two contests will be audited on four of the TSX devices, while the other two contests will be audited on the remaining four devices.
3. Audit Coordinator will retrieve the memory cards and Voter Verified Paper Audit Trail (VVPAT) security canister(s) for each selected device from secure storage in the Micro-Tally Systems (MTS) room.
4. For each memory card, staff will insert cards into one of eight AccuVote-TSX devices located in the audit area and power up each of the devices.
5. Staff will perform the following steps operating the AccuVote-TSX post-election interface on each device:
  - a. Press "Print Election Results" button. Press "OK".
  - b. "Print Summary Totals Only" button. Press "Yes".
  - c. "Print write-in candidates" button. Press "Yes"
  - d. "Print Long Report" button. Press "No"
  - e. "Another copy?" button. Press "No"
6. When the Election Results Summary Report completes printing, staff will scroll through the report and identify the selected contests to be audited for that device.
7. For each contest, results from the report will be cut out and stapled to a pre-printed manual tally sheet.
8. For each selected contest, audit team members will be instructed to take the following actions:
  - a. One clerk will scroll through the VVPAT (from the end of the roll to the beginning) looking for votes on each ballot cast for the contest in question. If a ballot is marked as rejected, the clerk will skip over the ballot.
  - b. Each identified vote will be called out and a second clerk will record the vote on the manual tally sheet for that contest. If the ballot is provisional, the second clerk will mark the vote in a separate total and will not include the provisional vote in the regular vote tally.

- c. After all ballots on the VVPAT have been reviewed and all votes have been called out and recorded, the manually tallied votes will be compared to the vote total from the Election Results Summary Report.
  - d. The clerks will roll up the VVPAT for use on other selected contests.
- 9. If the VVPAT paper roll for a particular device has any paper jams or other print errors that result in the ballot printout being illegible, the following steps will be employed:
  - a. From the TSX central tabulation system, the audit coordinator will print all stored ballot images for that device.
  - b. Each ballot image printed will be matched to a ballot on the VVPAT roll.

Through a process of review and deduction, staff will identify which ballots printed represent the ballots that did not print correctly on the VVPAT roll.

**VOTING SYSTEM INTEGRITY ACTIVITIES IN L.A. COUNTY**  
November 7, 2006 GENERAL ELECTION

The California Elections Code requires each local election official to conduct a manual count of ballots cast in a randomly selected 1% of the voting precincts in order to verify the accuracy of the machine count. This manual tally occurs during the vote canvass period prior to official certification of election results. This 1% manual count augments pre-election testing activities in demonstrating the integrity of the tabulation system. In addition to this legal requirement – and in the interest of enhancing public confidence in our voting systems – the Los Angeles County Board of Supervisors together with the Registrar-Recorder/County Clerk have established three additional activities to demonstrate the integrity and transparency of Los Angeles County's voting systems.

The activities listed below will be conducted prior to certification of the November 7, 2006 General Election results.

**All proceedings are open for public observation.**

---

**PRECINCT BALLOTS**

**Manual Count of BALLOTS FROM 1% OF Precincts**

(all contests; polling place ballots)

*Random selection of precincts will take place on Wednesday, November 8, 2006 at 3:00 p.m. in the Registrar's Executive Conference Room, 7<sup>th</sup> floor, Norwalk headquarters.*

<b>Dates:</b> Begins Saturday, November 11, 2006 and continues daily until completed.	<b>Authority:</b> California Elections Code (E.C.) Section 15360
<b>Time:</b> 8:30 a.m. – 4:00 p.m. on Saturdays and Sundays; 8:30 a.m. – 6:30 p.m. weekdays	<b>Description:</b> E.C. 15360 states: "During the official canvass of every election in which a voting system is used, the official conducting the election shall conduct a public manual tally of the ballots tabulated by those devices cast in 1% of the precincts chosen at random by the elections official. In addition to the 1% count, the elections official shall, for each race not included in the initial group of precincts, count one additional precinct. The manual tally shall apply only to the race not previously counted. Additional precincts for the manual tally may be selected at the discretion of the elections official."
<b>Location:</b> Registrar-Recorder/County Clerk headquarters, 12400 Imperial Highway, Norwalk; 7 <sup>th</sup> Floor Executive Conference Room	
<b>Coordinator(s):</b> Alex Olvera & Cynthia Taylor

**NOVEMBER 2006 ELECTION REPORT: MANUAL-TO-MACHINE COUNT  
COMPARISON OF A SAMPLE OF ABSENTEE BALLOTS**

**Introduction**

This is the final of three post-election reports of ballot tabulation audits of the November 7, 2006 General Election. The first two reports were sent to your Board last month in response to Board motions to audit 1) the votes cast on 5% of the Direct Record Electronic (DRE or Touchscreen) devices used for early voting in conjunction with that election, and 2) the unofficial "snap tallies" conducted by media on November 7<sup>th</sup>. In contrast to the above-mentioned reports, this report was initiated by our office and involved a manual-to-machine count comparison of a sample of absentee ballots. This absentee ballot audit afforded an additional means of highlighting the transparency, accuracy and integrity of all aspects of the County's ballot tabulation process. A chart describing the parameters of these three audits, in addition to the state-mandated manual-to-machine count audit of all ballots cast in a randomly selected 1% of the voting precincts, is found at Addendum 1.

**The Absentee Ballot Audit**

The RR/CC voluntarily, and with prior public notice and significant public participation, conducted a manual-to-machine count comparison of the results of several election contests on a randomly selected 1% of the absentee ballots that were tabulated on election night. The sample set of absentee ballots was selected in this manner in order to conduct this review as soon as practicable following election night (i.e. absentee ballot counting continues in the days and weeks following the election). Because 370,825 absentee ballots were counted on election night, the target quantity of 1% absentee ballots for the manual count comparison was established at 3,700.

Absentee ballots are currently counted by individual ballot groups and not by precincts (however, beginning with the 2008 elections, new State law will require more complex precinct-level tabulation of absentee ballots). Drawing 3,700 absentee ballots randomly from absentee ballot storage trays was not practical for this voluntary audit because hundreds of different ballot groups would have been involved. That would have hampered the ability to conduct a manual count comparison and greatly increased the time needed to complete it. Therefore, the random selection limited the number of ballot groups involved while still guaranteeing a significant number of ballots would be manually tallied in each group to achieve a viable comparison with the machine tally.

Two ballot groups were randomly selected from the 50 most voluminous, in terms of number of ballots cast, of the 517 ballot groups involved in the election. The list of all ballot groups in the November 2006 General Election, and the 50 most voluminous that were included in the random draw, is provided in Appendix A.

The selection of contests to examine in the manual count comparison was limited to countywide contests only, excluding judicial contests, to ensure that every selected contest would be on every ballot and that there would be a significant number of votes for the comparison (judicial contests typically have high rates of under voting or no votes cast). To further assure the feasibility of conducting the audit during a single day for the convenience of citizen observers, only one randomly selected contest was examined for each selected ballot group. The list of all contests contained in the random drawing is provided in Appendix B.

The ballot groups and contests were printed on individually folded slips of paper and placed in transparent containers on November 13, 2006. The random drawing of ballot groups and contests to audit was performed by citizen observers that day. The results of the random drawing of ballot groups and contests are provided in the table below.

Ballot Group	Contest Examined
360	Proposition 1C
378	Proposition 1D

#### **Obtaining Automated Absentee Ballot Tallys For Comparison**

Once the random drawing of ballot groups by citizen observers was finalized, elections staff began the laborious process of extracting ballots belonging to these ballot groups from the absentee ballots that were counted on election night until the total number of extracted ballots reached the 3,700 target sample. To accomplish this extraction, ballot card readers were configured to halt each time a ballot was identified from one of the selected ballot group numbers. This process eventually yielded slightly more than 1,500 ballots for ballot group 378, and just over 2,200 ballots for ballot group 360.

To further facilitate precision to the process of manually tallying these ballots, the number of ballots for these groups was further randomly reduced to exactly 1,500 and 2,200 for ballot groups 378 and 360, respectively. Subsequently, the ballot groups were divided into sub-groups of 300 ballots each, except for one with 100 ballots. Subdividing down to 300 ballots approximated the ballot counts in a typical voting precinct for this election and also enabled the manual counts to be recorded on a single manual tally sheet. All of these processes were open to public observation.

In order to compare the manual tally of these sub-groups to a machine count, each of the sub-groups was separately machine counted on the County's Microcomputer Tally System (MTS). Then a summary report was printed that showed the machine count for each sub-group. A detailed description of the procedures is provided in Appendix C.

### 1% Manual Count Comparison of Absentee Ballots

The results of the manual tally, as shown in the tables below by ballot group, subdivision, and contest, show a small range of variance (+1 to +4) between the manual and machine count, with many revealing no difference.

Ballot Group: 360  
 Ballot Count: 2200  
 Contest: Proposition 1C

Ballot Group - Subdivision	Ballot Count	Yes (Manual)	Yes (Machine)	Yes Diff.	No (Manual)	No (Machine)	No Diff.	Over Votes	Under Votes
360-A	300	133	133	0	146	146	0	0	20
360-B	300	135	135	0	140	139	+1	0	25
360-C	300	128	127	+1	142	142	0	0	30
360-D	300	123	121	+2	152	152	0	0	25
360-E	300	134	131	+3	146	145	+1	0	20
360-F	300	133	132	+1	150	150	0	0	16
360-G	300	127	125	+2	153	150	+3	0	20
360-H	100	49	49	0	46	46	0	0	5

Ballot Group: 378  
 Ballot Count: 1500  
 Contest: Proposition 1D

Ballot Group - Subdivision	Ballot Count	Yes (Manual)	Yes (Machine)	Yes Diff.	No (Manual)	No (Machine)	No Diff.	Over Votes	Under Votes
378-A	300	167	166	+1	99	98	+1	1	33
378-B	300	175	171	+4	94	94	0	0	31
378-C	300	174	173	+1	103	102	+1	0	23
378-D	300	174	170	+4	103	102	+1	0	23
378-E	300	169	166	+3	95	91	+4	0	36

Persons performing the manual tally identified a small number of apparent votes whereas the computer count did not. While some of this variance could be attributed to human error in the vote reading or tallying, a review of the ballots suggested that several of the vote marks were faint such that they might or might not have been intended votes. However, persons conducting the manual tally made the subjective determination to count the marks as intended votes whereas such marks did not reach the threshold of the fully-tested and legally-certified MTS optical scan tally system.

Additionally, unlike ballots cast at the precinct with a designated InkaVote pen, absentee voters do not always follow instructions to mark the ballot with a black or dark blue pen. Marks made with pencil or light-colored ink are more difficult to detect by the optical read heads. Faint, displaced or otherwise faulty vote marks have the potential to be misinterpreted both by the automated card readers and/or by the human eye. Such

situations can and do occasionally occur, thereby causing a very small variance between the machine and manual tally.

### **Conclusion**

On November 13, 2006, the Registrar-Recorder/County Clerk department voluntarily conducted a manual-to-machine count comparison of a randomly-selected subset of absentee ballots cast in conjunction with the November 7, 2006 General Election. A number of citizen observers were present and participated in the random drawing of selected absentee ballots for this auditing process. Although the manual-to-machine count comparison of ballot tally systems revealed minuscule variations (as do most such comparisons), the overall results of this audit confirmed the accuracy of the County's vote tabulation system.

## **Appendix C**

### ***Procedures for 1% Absentee Voter Manual Tally November 7, 2006 Gubernatorial General Election***

#### **Random Selection – November 13, 2006 Manual Count Comparison beginning November 20, 2006**

1. Welcome and Introduction
2. Brief description of the manual audit process.
  - a. 1% applies to absent voter (AV) ballots counted in the election night tally only. Since 370,825 AV ballots were included in the election night tally, the manual tally will be performed on no fewer than 3,700 AV ballots.
  - b. Once started, the manual tally may take a few days to complete.
  - c. Ballot group and contest selection is scheduled early to allow time for preparation of tally materials.
  - d. Manual tally will begin on Monday, November 20<sup>th</sup> continuing through November 22<sup>nd</sup> as needed.
3. Staff will produce a report from the Micro-Tally System (MTS) of AV ballot groups ranked by number of ballots counted in the election night tally.
4. Two ballot groups will be randomly selected from paper slips created for the 50 ballot groups with the largest number of ballots counted.
5. One contest per ballot group will be selected from paper slips created for all non-judicial countywide contests appearing on the ballot.
6. Staff will prepare header cards for the two ballot groups selected.
7. All AV ballots included in the election night tally will be pulled from the secure ballot cabinets in the MTS room and prepared for sorting using MTS card readers.
8. Using the header cards, card readers on at least two MTS systems will be configured to stop on the ballots identified in selected ballot groups.
9. Staff will run the AV ballots through the MTS card readers to select and sort ballots for the selected ballot groups. Once the target group of 1% of AV ballots included in the election night tally has been reached, the selection and sorting process will be stopped.
10. All ballots not selected in the target group for manual comparison will be returned to secure storage.
11. The number of ballot cards for each ballot group will be hand counted and recorded by the audit staff.
12. Header cards will be placed in front of each of the sorted AV ballot groups.
13. One MTS system and card reader will be taken off line and prepared to run an isolated tally of the selected target group of ballots.
14. The selected AV ballots with header cards will be run through the card reader.
15. The MTS system will produce vote totals by contest for each of the selected ballot groups.

*Report on Manual Count Sampling of Absentee Ballots*

16. The number of ballots on the MTS report will be compared to the hand count of each ballot group. If the numbers do not match, the ballots will be read and counted again until they are reconciled.
17. The 1% AV manual process moves to the manual tally area in the Registrar's conference room on the 7<sup>th</sup> Floor.
18. Audit teams, led by a manual tally supervisor from the Election Planning Division, begin the manual tally of the AV ballots.
19. The final report from the manual tally will be compared to the MTS produced tally. Any variances will be analyzed and a report will be prepared on the outcome of the manual audit proceedings.

001,27

## ADDENDUM 1

### VOTING SYSTEM INTEGRITY ACTIVITIES IN L.A. COUNTY

November 7, 2006 GENERAL ELECTION

The California Elections Code requires each local election official to conduct a manual count of ballots cast in a randomly selected 1% of the voting precincts in order to verify the accuracy of the machine count. This manual tally occurs during the vote canvass period prior to official certification of election results. This 1% manual count augments pre-election testing activities in demonstrating the integrity of the tabulation system. In addition to this legal requirement – and in the interest of enhancing public confidence in our voting systems – the Los Angeles County Board of Supervisors together with the Registrar-Recorder/County Clerk have established three additional activities to demonstrate the integrity and transparency of Los Angeles County's voting systems.

The activities listed below will be conducted prior to certification of the November 7, 2006 General Election results.

All proceedings are open for public observation.

---

### PRECINCT BALLOTS

#### Manual Count of BALLOTS FROM 1% OF Precincts (all contests; polling place ballots)

*Random selection of precincts will take place on Wednesday, November 8, 2006 at 3:00 p.m. in the Registrar's Executive Conference Room, 7<sup>th</sup> floor, Norwalk headquarters.*

<b>Dates:</b> Begins Saturday, November 11, 2006 and continues daily until completed.	<b>Authority:</b> California Elections Code (E.C.) Section 15360
<b>Time:</b> 8:30 a.m. – 4:00 p.m. on Saturdays and Sundays; 8:30 a.m. – 6:30 p.m. weekdays	<b>Description:</b> E.C. 15360 states: "During the official canvass of every election in which a voting system is used, the official conducting the election shall conduct a public manual tally of the ballots tabulated by those devices cast in 1% of the precincts chosen at random by the elections official. In addition to the 1% count, the elections official shall, for each race not included in the initial group of precincts, count one additional precinct. The manual tally shall apply only to the race not previously counted. Additional precincts for the manual tally may be selected at the discretion of the elections official."
<b>Location:</b> Registrar-Recorder/County Clerk headquarters, 12400 Imperial Highway, Norwalk; 7 <sup>th</sup> Floor Executive Conference Room	
<b>Coordinator(s):</b> Alex Olvera & Cynthia Taylor

Registrar-Recorder/County Clerk

December 5, 2006

TO:           Each Supervisor  
FROM:        Conny B. McCormack, Registrar-Recorder/County Clerk

**NOVEMBER 2006 ELECTION REPORT: MANUAL TO MACHINE COUNT  
COMPARISONS OF RANDOMLY SELECTED 5% OF SNAP TALLY PRECINCTS**

At the Board meeting on October 24, 2006, upon motion by Supervisor Yvonne Burke, your Board instructed the Registrar-Recorder/County Clerk (RR/CC) to:

1. Randomly select no fewer than 5% of the designated snap tally precincts to be manually counted and compared to the snap tally results produced on election night and the electronic vote count for those same precincts with this manual count to be conducted during, but separate from, the statutorily required random manual count of 1% of all voting precincts; and
2. Report back to the Board with the findings of the manual count by December 5, 2006, the statutory deadline for the official election certification.

**Introduction**

The California Elections Code requires each local election official to conduct a manual count of all contests on ballots cast in a randomly selected 1% of the Election Day voting precincts in order to verify the accuracy of the machine count. This manual tally occurs during the 28-day vote canvassing period prior to official certification of election results and augments extensive pre-election testing activities to demonstrate the integrity of the tabulation system.

In addition to the manual count audit required by the State Elections Code as described above, and in the interest of enhancing public confidence in the County's multiple voting systems, your Board requested two additional manual to machine count audits in conjunction with the November 2006 Election. Additionally, the Registrar-Recorder/County Clerk (RR/CC) decided to conduct a third supplemental manual audit of a sampling of absentee by mail ballots. A chart of all four audits is found at Attachment 1 following the Appendices.

This report addresses the manual to machine count comparisons for a 5% random selection of snap tally precincts. The report to your Board on the manual to machine count comparison of the randomly selected 5% of the electronic touchscreen voting units was issued yesterday. A report of findings of the RR/CC's audit of absentee by mail ballots will be issued later this week.

## **Background**

For many years, Los Angeles County has made snap tally services available to the news media to enable them to establish voting trends in certain election contests. Snap tally is a process described in California Elections Code Sections 14440 through 14443 (see *Appendix A*). Section 14440 states that the Board of Supervisors may find that

“...certain offices or measures to be voted on are of more than ordinary public interest and require an early tabulation and announcement.”

Los Angeles County is the only county in California where snap tallies are performed in conjunction with major elections. Snap tallies take place after all polls have closed. The media companies who request snap tallies use the unofficial close-of-polls data received through snap tallies to compare with the data they gather in the course of conducting Election Day exit polls.

The RR/CC does not use snap tally results for any purpose, but simply coordinates the process at the request of media companies that conduct exit polls

In elections prior to November 7, 2006, after the polls closed at 8 p.m., pollworkers in media-selected snap tally precincts manually tallied the ballots for those candidates and measures requested by media companies. This process added considerable time to the already lengthy work day of pollworkers. Although RR/CC offered pollworkers an additional stipend for performing this task, it was not uncommon for pollworkers in some of the selected precincts to refuse to conduct the snap tally at the end of their 14+ hour work day.

## **November 7, 2006 General Election Snap Tally**

For the November 2006 General Election, the RR/CC piloted a method of conducting snap Tallies at the close of polls that utilized a feature of the newly-implemented InkaVote *Plus* precinct ballot readers (PBRs) to retrieve the votes cast. This method significantly reduced the time needed to conduct the snap tallies, placing less of a burden on pollworkers in the selected precincts. It also resulted in faster reporting of snap tally results to the requesting media organizations.

RR/CC staff trained pollworker Inspectors in the selected precincts (see *Appendix B*) to obtain unofficial election results from the new InkaVote *Plus* PBRs after the end of the voting day. This process was much less time-consuming, taking less than five minutes, compared with the manual process of past snap tallies. As a result, it was not necessary to pay an additional stipend to the pollworkers for this task and the rate of cooperation from precinct Inspectors in the 38 snap tally precincts was very good.

As directed by your Board, the Department conducted a 5% random manual audit of the snap tally totals during the vote canvassing period in order to compare the snap tally results to election night precinct vote totals on the PBRs and on the central vote tally equipment in Norwalk. A 5% random audit entailed selection of two (2) of the 38 snap tally precincts..

### **Snap Tally Manual Audit**

The random selection process of snap tally precincts for manual audit was conducted on November 13<sup>th</sup> with prior notification to citizens who had expressed interest in observing. Several observers were present for and participated in this random selection of the two precincts which elicited precinct numbers 4150048A and 6700054A. Procedures for this process are detailed at Appendix C.

However, while assembling the election materials for the manual audit, staff discovered that precinct 4150048A was one of two precincts in a Neighborhood Voting Center (NVC). By design, only one InkaVote Plus PBR was deployed at NVCs to accommodate two voting precincts. Therefore, the PBR vote totals contained combined results from two voting precincts and would render meaningless any comparison to either election night centralized tally results of individual precincts or a manual tabulation of that single precinct's ballots.

As a result, staff drew a replacement precinct from the remaining snap tally list. Precinct 5850027A was selected to replace the above NVC precinct for the manual audit.

Subsequently, manual audits were conducted on precincts 5850027A and 6700054A on November 14 and 15, 2006. Although previous observers were given notice, no members of the public appeared to observe the manual audits on these days. *Appendix D* details the results of the audit, showing the comparison among election night centralized tally of precinct results, snap tally totals on the PBRs and the manual counts.

An explanation of the differences among the three results follows.

#### **Total Number of Ballots Cast**

In precinct 5850027A, the total number of ballots counted during the election night snap tally using the PBR was 242 compared with the election night centralized tally of 241 ballots. The difference of one ballot resulted from the fact that one voter cast an audio ballot on the new disability access voting unit. Audio ballots are a slightly different format and are subsequently re-made on standard ballot card stock prior to centralized ballot tabulation in Norwalk. The manual audit of this snap tally precinct occurred prior to the re-make process, thereby accounting for the one vote difference during the audit.

In precinct 6700054A, the total number of ballots counted during the election night snap tally using the PBR was 297 compared with the election night centralized tally of 305 ballots. A telephone conversation with this precinct's Inspector (lead pollworker) indicated that eight voters declined to feed their ballots through the InkaVote *Plus* PBR. These voters deposited their ballots directly into the ballot box at the voting precinct, bypassing the PBR which was there for error-detection of over and undervotes. This resulted in a variance between the precinct count from the PBR and the centralized vote tally in Norwalk later that evening.

#### **Votes for Specific Contests**

In precinct 5850027A, one additional vote was counted during snap tally in several races compared to the election night centralized vote tally for this precinct. This is a result of the audio ballot which was isolated for re-make as described above.

In one contest, State Measure 1B, there was a two vote variance between snap tally and election night results. This difference also emerged during the manual audit leading to the

conclusion that one voter's mark for this proposition was either inadvertent or too lightly marked to be detected by the centralized vote tabulating equipment, but was discerned to be a probable vote by the person manually examining the ballot and by the PBR.

In precinct 6700054A, there are variances between the snap tally and election night centralized tally due to the difference in total ballots cast explained above as a consequence of eight voters opting to deposit their ballots directly into the ballot box without feeding them through the PBR at that precinct.

### **Conclusion**

Snap tallies are not a part of the County's official election results. Snap tallies are simply requested by media to provide a quick election night snapshot comparison with media exit polling in several ballot contests.

## **Appendix A**

### ***California Elections Code Sections Governing the Conduct of Snap Tallies***

14440. Before any election, the governing body of the jurisdiction holding the election shall decide that certain offices or measures to be voted on are of more than ordinary public interest and require an early tabulation and announcement. The decision shall be transmitted to the elections official not less than 30 days before the election.

14441. The elections official shall prepare and forward to each selected precinct forms containing a list of the offices and measures designated as being of more than ordinary interest, and stating the number of ballots to be counted for the snap tally. In each general election, the special form shall, for each office listed on it, include the names of all candidates for that office whose names appear on the ballot.

The inspector at each selected precinct shall note the results of the count and the total number of votes cast in the precinct on the snap tally forms as soon as the designated number of ballots has been tallied. The inspector shall then communicate the figures in the manner directed by the elections official. In each general election, the figures shall include the votes cast for every candidate whose name appears on the ballot for an office listed on the forms. The inspector shall continue, each time the designated number of ballots have been tallied, to note and report the results as directed.

14442. Upon receipt from the precincts of the reports of votes cast on the specially designated offices and measures, the elections official shall tabulate the results and make the results available to the public. In each general election, all these reports of the election results shall include the votes cast for all candidates whose names appear on the ballot for each office for which returns are reported.

14443. If ballots are counted by means of electronic, electromechanical, or punch card device, the elections official may provide for early tabulation and announcement of the returns in a manner consistent with the use of the tabulating devices.

### ***Procedures for 5% Snap Tally Manual Audit November 7, 2006 Gubernatorial General Election***

#### **Random Selection – November 13, 2006 Manual Count Comparison beginning November 14, 2006**

1. Welcome and Introduction
2. Brief description of the manual audit process.
  - a. 5% applies to the Snap Tally precincts selected by media for results at the close of polls.
  - b. Random precinct selection is scheduled early to allow time for preparation of tally materials.
  - c. Manual tally will begin on Tuesday, November 14<sup>th</sup> continuing through November 22<sup>nd</sup> as needed.
3. Two precincts will be randomly selected from paper slips containing the precinct numbers of each of the 38 Snap Tally precincts.
4. Staff will produce a report from the Micro-Tally System (MTS) of the randomly selected Snap Tally precincts.
5. Contests to be manually recounted will be those selected by media for the randomly selected Snap Tally precincts.
6. Ballots from the two precincts will be pulled from the secure ballot cabinets in the MTS room
7. Audit teams, led by a manual tally supervisor from the Election Planning Division, begin the manual tally of the AV ballots.
8. The final report from the manual tally will be compared to the MTS produced tally and to the Snap Tally report prepared by precinct Inspectors on election night. Any variances will be analyzed and a report will be prepared on the outcome of the manual audit proceedings.

**VOTING SYSTEM INTEGRITY ACTIVITIES IN L.A. COUNTY**  
November 7, 2006 GENERAL ELECTION

The California Elections Code requires each local election official to conduct a manual count of ballots cast in a randomly selected 1% of the voting precincts in order to verify the accuracy of the machine count. This manual tally occurs during the vote canvass period prior to official certification of election results. This 1% manual count augments pre-election testing activities in demonstrating the integrity of the tabulation system. In addition to this legal requirement – and in the interest of enhancing public confidence in our voting systems – the Los Angeles County Board of Supervisors together with the Registrar-Recorder/County Clerk have established three additional activities to demonstrate the integrity and transparency of Los Angeles County's voting systems.

The activities listed below will be conducted prior to certification of the November 7, 2006 General Election results.

**All proceedings are open for public observation.**

---

**PRECINCT BALLOTS**

**Manual Count of BALLOTS FROM 1% OF Precincts  
(all contests; polling place ballots)**

*Random selection of precincts will take place on Wednesday, November 8, 2006 at 3:00 p.m. in the Registrar's Executive Conference Room, 7<sup>th</sup> floor, Norwalk headquarters.*

<b>Dates:</b> Begins Saturday, November 11, 2006 and continues daily until completed.	<b>Authority:</b> California Elections Code (E.C.) Section 15360
<b>Time:</b> 8:30 a.m. – 4:00 p.m. on Saturdays and Sundays; 8:30 a.m. – 6:30 p.m. weekdays	<b>Description:</b> E.C. 15360 states: "During the official canvass of every election in which a voting system is used, the official conducting the election shall conduct a public manual tally of the ballots tabulated by those devices cast in 1% of the precincts chosen at random by the elections official. In addition to the 1% count, the elections official shall, for each race not included in the initial group of precincts, count one additional precinct. The manual tally shall apply only to the race not previously counted. Additional precincts for the manual tally may be selected at the discretion of the elections official."

## EXPERTS' GAME

# How Elections Can Be Rigged Via Computers

BY RICHARD BERGHOLZ

Times Political Writer

Admirals and generals have their war games. Computer experts have their own form of intellectual exercise.

Recently, six computer experts met in Westwood and devised their own form of war games: How to rig an election, using computer techniques.

Three of the men formed the offensive team—the group trying to find ways of rigging the machines. The other three men went on defense trying to devise ways of detecting fraud.

In each test, the offensive team won. Highly sophisticated techniques were devised for the computers which were not detected or prevented by countermeasures. And the scientists making up the teams were of equal brilliance, including some from the RAND Corp. in Santa Monica and from university ranks.

### Chilling Look at Computer

To the six men involved, this was a "game." To election officials, it was a chilling look at the state of computer art and the implications it holds for future elections here.

The computer is the key to elections in Los Angeles County—and many other parts of the nation. The computer is used to count punch card ballots here.

You feed punch card ballots, with holes in them punched by the voter, into a machine. The machine counts the holes and thus records the votes. How do you know the machine counts all the holes, or allocates the votes accurately? You test the machine before and after the vote count.

But there are a growing number of computer experts who contend it is possible to tell the machine to do its accuracy tests correctly and then to cheat a little in between the tests. And then conceal the fact that it has been cheating.

### Loser Asked for Review

As far as can be determined, nobody has filed any serious charge of possible fraud. In one partisan race, a losing candidate quietly instructed computer experts to review election procedures to see if there had been any funny business, but was told there was no hard evidence of misconduct.

Nevertheless, officials of both major parties are interested in updating security provisions to safeguard against any future fraud. When so much power and sometimes money rides on the outcome of an election, they say, someone sometime is going to be tempted to try to "buy" a victory by rigging the machines that count the votes.

Ray E. Lee, county registrar-recorder, and Rex E. Layton, city clerk, who run elections in their respective areas, are equally concerned about maintaining public confidence in the vote count.

Of course, John Q. Citizen has more than a passing interest in assurances that his vote counts—and is counted.

It used to be, not so long ago, that you marked a paper ballot with an "x" to record your political choice. And you or your representative could stand over the shoulders of the precinct officials as they record

ed your vote, and others, on the old-fashioned "one-two - three - four-cross-hatch" system.

If the election officials improperly recorded a vote, someone could protest, on the spot.

But all that's changed.

### Punch Holes

You vote by punching holes in a pre-scored card. The card (ballot) then leaves the polling place and is taken to a collection center, and then on to a computer in the downtown area.

Why never uncounted ballots are being transported around the city, there's cause for concern. Both the county and city election officials go to considerable effort to see that nothing happens to them.

When voting ends, the precinct officials open the ballot box, take the punch cards out, put them in small cardboard boxes and

### Deliver Ballots

It's the job of the precinct election officials to deliver the voted—but uncounted—ballots to a collection center. From there, they are delivered by car (sometimes helicopter) to the computer centers in the Wilshire district. Sometimes peace officers drive the cars.

At the computer centers, the ballot containers are checked in, the seals broken and the ballots checked by inspection teams to guard against bent, torn or damaged punchcards which might jam the machinery during the count.

Moving about the computer center with opened but uncounted ballots presents something of a security problem. In partisan elections, party representatives are invited to watch. But state law prohibits them from being in a position where they can physically touch the ballots.

### Machines Take Over

Everything up to this point has been a matter of guarding the ballots before they go into the machines. From this point on, the machines take over.

The punch-card ballots are fed into machines which read the information (holes) on the card and transfer it to magnetic tape. Crucial to the process is the placement of "header" cards with every precinct. The cards tell the computer what holes to count on the ballot and what the proper order of candidates is.

Once the ballot information is transferred to tape, the tape is fed into the giant computer which actually counts the votes and turns the results out in the form of punched cards.

These cards are fed into a transmitting machine which relays the information to county election headquarters or City Hall where the totals are printed and made public.

### Center of Arguments

In all of the delibera-

heard all the stories about possible hijacking of the ballots from one point to another, breaking the seals and jiggling the cards themselves and even losing the ballots through some kind of accident.

But during all these discussions, relatively little attention was given to the possibility of fraud once the ballots reached the computers.

The fears about some kind of monkey-business by humans during the moving of the ballots from precinct to machine have been largely without foundation—as far as anyone knows.

There was one case where a police officer, driving a car with uncounted ballots in it, stopped on the way to the computer to chase down an errant motorist and give him a ticket. But the ballots were safe and undisturbed during the hiatus.

But the fears have turned to the machines themselves—or, more specifically, the men who tell the machines what do do.

#### Present Order

Here's what the present order calls for, as a means of "proving" the accuracy of the machines:

On the night of the vote count, before the first ballots are fed into the machine, a logic-and-accuracy test is run. This is designed to prove the efficiency of the computer program, the set of instructions which tells the machine what to do.

Election officials set up a test run designed to challenge every function the computer will have to perform. In the general election last year, 2,395 ballots were fed into the system in the test. These contained a predetermined number of votes (435 for Nixon, 483 Wallace and 513 for Humphrey). The machine handled the cards and came up with the correct

#### 100% Accurate

After the long night of ballot-counting, the same logic-and-accuracy test cards again were fed into the machines. Again, 100% accurate.

If the machines were functioning accurately at the start, and also at the finish, they must have been functioning properly in between.

Not necessarily.

Any number of qualified, dispassionate, apolitical scientists contend it is technically possible to rig a computer so that it tells the truth at the start and at the finish, but cheats a little in between.

Technically, it is possible to alter the computer's program so that it counts the first nine votes for candidate A but gives the 10th vote to his opponent, candidate B. And this can go on under varying conditions can be applied to specified precincts or groups of precincts. And, at the end, it can be told to go back to being honest again—and forget about its aberrations in case anyone asks.

Obviously, you'd have to (a) know an awful lot about computers and the specific program being used and (b) have access to the program in some areas.

There aren't many people who meet those conditions.

But there's always the fear that, if the pressure is great enough and the price high enough, someone might make it.

IBM, which sold the system to the county and then announced it was going out of the selling business, agreed to write the master program which covers the election problem.

Officials at IBM said they laid out the general logic for the program and hired a firm in Oakland, which in turn hired one in Portland, to do the coding work.

The program for the election is a massive document. County election officials estimated there are from 10,000 to 15,000 cards in what is called the "source deck" and about 1,500 cards in the object deck.

Obviously, the program is very valuable. IBM won't say what it cost in dollars but estimated it took three to six men from six to nine months to work it out.

The county keeps two copies of the program—one in a fireproof vault and another in its electronic data processing department at the registrar of voters building.

An IBM official said the program belongs to the firm, which is required by contract to supply a copy to the county. IBM has the source decks in its possession.

One IBM official stoutly denied it is technically possible to tamper with the vote-counting process. But this view is disputed by scores of experts in the field.

Most agree that there is a growing number of computer experts knowledgeable enough to devise ways of modifying the program so as to alter the vote count. There are relatively few people who have sufficient access to the program to do anything about it.

There have only been two cases of program error recorded in local experience with the computer-counted elections.

One was in Pasadena, where a computer error resulted in the machine failing to count any "yes" votes on a bond issue in five precincts. The other was in Inglewood where a computer error resulted in the machine failing to tally votes for any candidates in 19 precincts of a school board race.

In both cases, logic-and-accuracy tests had been run and had failed to de-

After all, if you see precinct returns with not one "yes" vote on a bond issue where you know there should be, or not one vote for a candidate where many are expected, something is wrong.

But suppose the program error had resulted in the machine counting all but 1/10 of the "yes" votes for the bond issue in Pasadena, or all the candidate votes in Inglewood but allocated one-tenth of candidate No. 3's votes to candidate No. 2.

How would the error have been detected?
